GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

HAZ WASTE: Hazardous Waste Information Listing

The records in this data set are generated by county SQG Assessment, Notification and Verification Programs on-site surveys (see 403.7225 FS). The waste records are wastes observed during county inspections. Even though this state program targets SQGs and VSQGs for outreach, some counties choose to additionally look at their LQGs.

HW GEN: Hazardous Waste Generators

Small Quantity Hazardous Waste Generators are regulated under the federal Resource Conservation and Recovery Act (RCRA) and applicable state regulations as generators of hazardous wastes in quantities greater than 100 Kg but less than 1,000 Kg in any one calendar month. Large Quantity Generators of Hazardous Waste are tracked in this coverage based on their notification to the Department of Environmental Protection as to their handler status, or based on inspections conducted at their facilities. These facilities are regulated under the federal Resource Conservation and Recovery Act (RCRA) and applicable state regulations as generators of hazardous wastes in quantities equal to or greater than 1,000 Kg in any one calendar month.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

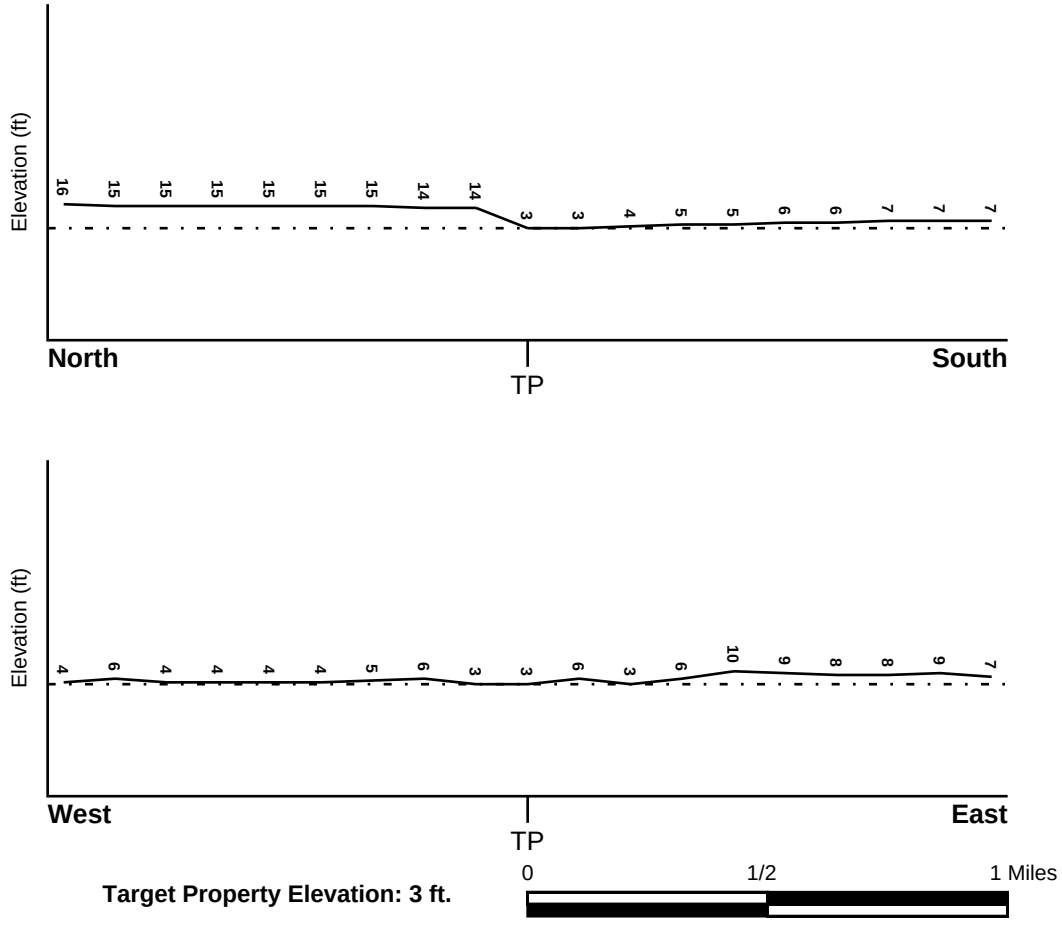
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 3 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
12011C0376H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
12011C0357H	FEMA FIRM Flood data
12011C0378H	FEMA FIRM Flood data
12011C0359H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
POMPANO BEACH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
C7	1/8 - 1/4 Mile ENE	SE
C11	1/4 - 1/2 Mile ENE	SE
1G	1/4 - 1/2 Mile ENE	SE
2G	1/8 - 1/4 Mile ENE	SE

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	Water
Soil Surface Texture:	
Hydrologic Group:	Not reported
Soil Drainage Class:	
Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name:	Immokalee
Soil Surface Texture:	fine sand
Hydrologic Group:	Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.
Soil Drainage Class:	Poorly drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
2	5 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
3	35 inches	53 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
4	53 inches	72 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: Arents, organic substratum

Soil Surface Texture: cobbly sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	cobbly sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1
2	11 inches	38 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1
3	38 inches	51 inches	muck	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1
4	51 inches	72 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1

Soil Map ID: 5

Soil Component Name: Udorthents, shaped

Soil Surface Texture: cobbly sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	29 inches	cobbly sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	29 inches	50 inches	sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
3	50 inches	50 inches	bedrock	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

Soil Map ID: 6

Soil Component Name: Paola

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sand	Not reported	Not reported	Max: 141 Min: 141	Max: 7.3 Min: 3.6
2	3 inches	25 inches	fine sand	Not reported	Not reported	Max: 141 Min: 141	Max: 7.3 Min: 3.6
3	25 inches	79 inches	fine sand	Not reported	Not reported	Max: 141 Min: 141	Max: 7.3 Min: 3.6

Soil Map ID: 7

Soil Component Name: Immokalee

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
2	5 inches	35 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
3	35 inches	53 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6
4	53 inches	72 inches	fine sand	Not reported	Not reported	Max: 141 Min: 42	Max: 6 Min: 3.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE MAP - 7810791.2s

- County Boundary
- Major Roads
- Contour Lines
- Airports
- Earthquake epicenter, Richter 5 or greater
- Water Wells
- Public Water Supply Wells
- Cluster of Multiple Icons
- Groundwater Flow Direction
- Indeterminate Groundwater Flow at Location
- Groundwater Flow Varies at Location
- Closest Hydrogeological Data
- Oil, gas or related wells
- Sink holes

No contour lines were detected within this map area.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Babu Madabhushi, PhD

Years of experience
31 total | 25 with AECOM

Babu has 31 years of experience in conducting and managing environmental engineering projects. His technical expertise is in the areas of conducting contamination assessment, evaluation, water/wastewater treatment, groundwater treatment, remedial system operation and maintenance.

Babu is extremely knowledgeable of FDOT District Four, Florida's Turnpike Enterprise, DERM, FDEP and local regulations and standards. His expertise also encompasses sediment characterization, dredge design, RCRA Facility Investigation, contamination assessment, impact assessment, remedial investigation and feasibility studies, soil and groundwater remediation, in-situ bioremediation, and operation and maintenance of remedial systems.

Professional experience

Contamination Assessment and Remediation Services - BEE68, FDOT District Four (2022 – Present). Managing CAR Contract that included several task orders for projects that require soil and groundwater assessment, dewatering treatment and management, and regulatory agency coordination. The projects are located in Broward, Palm Beach, St. Lucie, and Martin Counties.

Contamination Assessment and Remediation Services - BE678, FDOT District Four (2020 – 2022). Managing CAR Contract that included several task orders for projects that require soil and groundwater assessment, dewatering treatment and management, and regulatory agency coordination. The projects are located in Broward, Palm Beach, St. Lucie, and Martin Counties.

Contamination Evaluation and Screening -PD&E Studies, FDOT District Six, Miami-Dade (SR-826, NW 74th St), Broward (I-95 Express Lanes, SW 10th St, Miami Gardens to County Line), St. Lucie (SR-80), Martin, and Monroe (US-1) Counties, FL (2003 – 2021). Developed CSER for more than 30 project locations and Re-Evaluation Reports for several FDOT projects in Miami-Dade (SR-826, NW 74th St), Broward (I-95 Express Lanes, SW 10th St, I-95), St. Lucie (SR-80), Martin, and Monroe (US-1) counties.

SR-826/Palmetto Expressway from north of NW 25th St to North of NW 104th St CSER, FDOT District Six, Miami-Dade County, FL (2022 – 2024). Contamination lead for the FDOT PLEMO with environmental assessment support services for the SR-826/Palmetto Expressway CSER. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on contamination potential.

SR-826/Palmetto Expressway from South of NW 25th St to North of NW 154th St SEIR, FDOT District Six, Miami-Dade County, FL (2020 – 2021). Contamination Lead to provide the FDOT PLEMO with environmental assessment support services for the SR 826 / Palmetto Expressway SEIR. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on contamination potential**.**

I-95 from South of NW 10th St to North of Hillsboro Boulevard, FDOT District Four, Broward County, FL (2017 – 2021). Contamination Lead for environmental tasks associated with the performance of a PD&E Study. Tasks include Contamination Lead to provide the FDOT PLEMO with environmental assessment support services. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on their contamination potential**.**

Education

PhD, Hazardous Waste Management, West Virginia University, 1997
MS, Wastewater Treatment, Indian Institute of Technology, 1993
BS, Civil Engineering, Kakatiya University, 1988

Expertise

CAR Project Manager
Contamination Assessment
Remedial Design
Remedial Action Implementation
Water/Wastewater Treatment
Groundwater Treatment
Remedial System Operation and Maintenance
Sediment Characterization

Training

40-hr OSHA HAZWOPER
8-hr OSHA HAZWOPER Annual Refresher

Registrations/Certifications

AECOM Certified Project Manager
AECOM Lead Verifier: In Situ Bioremediation

SR-826/Palmetto Expressway from US-1 (SR-5) to SR-836 / Dolphin Expressway, FDOT District Six, Miami-Dade County, FL (2018 – Present). Contamination lead for environmental tasks associated with the performance of an approximate 7-mile PD&E Study**.** Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on their contamination potential.

I-75 from Miami-Dade County Line to SR-826 (Palmetto Expressway) PD&E Study, FDOT District Six, Miami-Dade County, FL (2007 – Present). Contamination lead for the performance of a PD&E Study. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on their contamination potential.

Wagner Creek/Seybold Canal Contaminated Sediment Dredging and Disposal (2017 – Present). Managed this critical project in a heavily commercialized area near Jackson Hospital. This included sediment dredge design, permitting, contaminated sediment characterization/handling, sediment stabilization, turbidity control and disposal at out of state landfill. Won multiple awards (from FDEP and other entities) for successfully completing this under budget and within schedule without harming the manatees.

Former Eaker Air Force Base Remediation, U.S. Air Force, Blytheville, AR (2011 – 2021). Project manager for this performance-based remediation contract to obtain unrestricted closure for four former RCRA sites at the former Eaker AFB. The sites are contaminated with petroleum compounds, light non-aqueous phase liquid, chlorinated solvents, and arsenic. Services include remedial investigation, innovative remediation enhancements, contaminated soil removal, in-situ soil and groundwater remediation, GIS mapping and support, groundwater modeling, and routine regulatory interaction. After successful completion or remedial investigation, the site is currently undergoing active groundwater remediation. He is also responsible for performing EPA's 5-Year Review Process.

Miami Dade DERM-14/E20 Contracts, Miami-Dade Aviation Department, Miami International Airport, Opa Locka Airport, Public Housing, Northwest Cargo Area, Miami, FL (2002 – 2021). Managed several projects that included delineation of petroleum, chlorinated solvent, and metals contamination at these properties. Installed several deep nested wells to delineate contamination in various zones of the aquifer. Multiple wells were installed in the vicinity of the runways, in the public right of way, and in the vicinity of residential areas. Currently overseeing the long-term groundwater monitoring activities.

Former Homestead Air Force Base Remediation, US Air Force, Homestead, FL (2011 – 2021). Deputy project manager for a performance-based remediation contract to obtain unrestricted closure for four former RCRA sites at the former Homestead AFB. The sites are contaminated with petroleum compounds, chlorinated solvents, and arsenic. Services include remedial investigation, preparation of Explanation of Significant Differences (ESD) to Record of Decision (ROD) document, innovative remediation enhancements, contaminated soil removal, in-situ soil and groundwater remediation, storage tank removal, remedial design modifications, GIS mapping and support, groundwater modeling, and routine regulatory interaction. After successful completion or remedial investigation, the site is currently undergoing active groundwater remediation. He is also responsible for performing EPA's 5-Year Review Process.

Contamination Evaluation Studies, FGT, Miami-Dade, Broward, St. Lucie, Martin, Bradford, Hillsborough, Orange, and Monroe Counties, FL, (2006 – Present). Contamination Specialist, responsible for developing contamination evaluation reports and Contingency Plans for numerous project locations in Miami-Dade, Broward, St. Lucie, Martin, Bradford, Hillsborough, Orange, and Monroe counties for projects associated with hydrotesting, pipeline maintenance/repairs and pipeline abandonment work.

Blue Lagoon Post Office Site Assessment, Remediation, and Methane Collection System, US Postal Service, Miami, FL (2003 – Present). Project Manager/Senior Environmental engineer for contamination assessment at a facility constructed over a filled-in canal where lead was found in the soil above state cleanup levels. Work included soil and groundwater remediation activities and methane gas collection system design and monitoring. Currently, AECOM is performing natural attenuation monitoring and methane gas monitoring.

Remediation Engineering, Federal Aviation Administration (FAA), William J. Hughes Technical Center, Atlantic City, NJ (2005 – 2012). Remediation engineering task leader for operation and maintenance of treatment systems for approximately 5,000-acre CERCLA Superfund site at Areas B, D, 20A, 29, and Area 41. Assisted with operation and maintenance of the existing Central Treatment Plant (Pump and Treat System) to treat petroleum contaminated water. Provided innovative remediation enhancements, such as in-situ aerobic bioremediation of petroleum compounds and reductive dechlorination of chlorinated solvents, contaminated soil removal, vapor extraction, groundwater and soil investigations, GIS mapping and support, groundwater modeling, and routine regulatory interaction.

Executive Summary

South Florida Water Management District (SFWMD) authorized AECOM Technical Services, Inc. (AECOM) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the S13 Pump Station Facility (subject property). This site is identified by Broward County Parcel Identification Numbers (PINs) 5041-25-01-0490, 5041-25-01-0500, 5041-25-01-0700, 5041-25-01-0850 and 5041-25-01-0860, Davie, Broward County, Florida. This Phase I ESA was performed in general conformance with the scope and limitations of ASTM International, Designation: E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). Exceptions to, or deletions from, this practice are described in this report.

The site visit was conducted on April 15, 2025. The approximate 12-acre subject property encompasses an estimated 4.6 acres of the South New River Canal, a pump station with a gated spillway structure, S13, a single-story control building that houses electrical equipment used to operate different features of the structure, and an ancillary storage building that houses two (2) emergency generators with 200-gallon diesel ASTs, a skid steer loader, coolants, lubricants, and other petroleum-based products for machine maintenance. Operations at this facility are normally controlled automatically but may be controlled manually during emergencies or for servicing. The onsite structures are reinforced concrete. The pump station is reinforced concrete with concrete block superstructure, equipped with three (3) 60-inch vertical propeller pumps. Each pump is powered by an in-line diesel engine complete with a 150-gallon diesel day tank. A 10,000-gallon AST containing diesel fuel was observed south of the pump station on the northcentral portion of the subject property. A refueling system allows the day tanks to be refilled by the 10,000-gallon AST. The refueling system is outfitted with a secondary containment pipeline. Two (2) ASTs, less than 500 gallons, were observed on the south-central portion of the subject property. SFWMD District personnel stated the ASTs are temporary tanks that are currently empty and not in use. They are connected to a portable pump system. District personnel stated the pump system may be utilized to assist in flood water mitigation. No leaks, discharges, distressed vegetation, or staining were observed or has been reported. Additionally, two (2) stilling wells were observed north of the South New River Canal, one is west of the pump station and the other is east of the pump station. The wells are utilized to automatically record surface water elevations at a frequency designated by SFWMD. The wells are protected with a locked metal lid. No visual potable water wells, clarifiers, dry wells, septic tanks, or leach fields were observed during the site visit. No visual evidence of discolored soil, water, or unusual vegetative conditions or odors were identified during the site visit. In addition, no visual evidence of significant corrosion was identified on the floors or walls of the pump station or buildings on the subject property. The general layout of the subject property is illustrated in Figure 2 - Site Plan and Representative Site Photographs are provided in Appendix A.

The subject property is located in a mixed-use area of residential and commercial properties within the city of Davie. State Road 7/US-441 cuts through the eastern portion of the subject property. The subject property is bordered to the northwest by Orange Drive followed by Versatile Warehousing, a business and storage facility and Broward Corporate Center and to the northeast by South Fork Canoe Launch, a recreational park maintained by Broward County, followed by a small lake. The subject property is bordered to the east by the South New River Canal. The subject property is bordered to the southwest by Griffin Gardens Apartments, Swaying Palms Mobile Home Park, and Jet Auto Commercial Plaza and to the southeast by a vacant lot followed by Corporate Coaches, a limousine service followed by a Wendy's restaurant. The subject property is bordered to the west by the South New River Canal. Gasoline service stations and dry cleaners were not observed in the immediate vicinity (approximately 500 feet) of the subject property. Other off-site sources of concern were not identified in the immediate vicinity.

A review of historical aerial maps indicated that the subject property was developed with the South New River Canal extending east to west through the center subject property. An unimproved dirt road (present-day State Road 7/US 441) cuts through the eastern portion of the subject property and agricultural row crops are depicted on the south-central portion of the subject property from at least 1940. Additionally, a small canal parallel and west of the dirt road is depicted. By at least 1952, disturbed land is depicted north of the South New River Canal and east of the State Road 7/US 441 on eastern portion of the subject property. By at least 1958, the small canal parallel to State Road 7/US 441 is no longer depicted and State Road 7/US 441 has been widened and paved. The S-13 pump

All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

station is depicted west of the State Road 7/US 441. A small, U-shaped channel has been constructed south of the pump station creating a small peninsula of land that extends west from State Road 7/US 441. A dirt road extending east from State Road 7/US 441 and disturbed land and/or a staging area is depicted north of the South New River Canal on eastern portion of the subject property. By at least 1961, two (2) finger channels extending south from the South New River Canal are depicted west of the S-13 pump station. The piece of land between the two finger channels has been cleared and grubbed. By at least 1968, the peninsula of land has been cleared and grubbed, and a marina is depicted east of State Road 7/US 441 and south of the South New River Canal. Additionally, the small portions of land in that area have been cleared and appear to be part of the marina. By at least 1971, additional land clearing is depicted west of the two finger canals. By at least 1992, the staging area on the northeast portion of the subject property is no longer depicted. A small channel is depicted north of the South New River Canal and east of State Road 7/US 441. The channel extends north then east, beyond the subject property boundaries. By at least 1999, a paved entryway and parking lot are depicted on the peninsula south of the pump station. By at least 2002, the 10,000-gallon AST is depicted south of the S-13 pump station, on the northern portion of the peninsula. By at least 2004, the trash rake structure situated within the South New River Canal is depicted west of the S-13 pump station. By 2014, construction activities are depicted within the peninsula. By at least 2015, the control building, the ancillary storage building, and canal bank stabilization improvements are depicted on the peninsula. By at least 2016, two (2) stilling wells are depicted north of the South New River Canal, one is west of the pump station and the other is east of the pump station. By at least 2017, a dirt road is depicted parallel and south of the South New River Canal on the southwestern portion of the subject property. The dirt road extends west outside of the subject property boundaries. By at least 2023, the previously depicted marina on the southeastern portion of the subject property, south of the South New River Canal has been demolished and backfilled, and redevelopment activities and canal stabilization are depicted. The subject property has remained in its current configuration (as observed during AECOM's site visit) since at least 2023. No recognized environmental conditions (RECs) were identified based on the historical review.

The subject property was identified on the AST, Hazardous Waste, Aerometric Information Retrieval System (AIRS), Broward County Hazardous Materials and Financial Assurance databases with Florida Department of Environmental Protection (FDEP) Facility IDs (Nos.) 8622542, 220920, 112780, 02279. Environmental Data Resources, Inc.'s (EDR) environmental database search report obtained for this project. A number of surrounding sites were identified in the EDR environmental database search report. Based on AECOM's review and analysis of the database listings, none of the surrounding sites are expected to present a REC to the subject property, based on the absence of documented contamination, distance (generally greater than 500 feet), regulatory status (i.e., regulatory closure, no violations found), media impacted (soil only), and/or topographical position relative to the subject property (i.e., down-gradient or cross-gradient).

Based on the above-described circumstances, no RECs, controlled RECs (CRECs), historical RECs (HRECs), significant data gaps or de minimis conditions (DMCs) were identified in connection with the subject property.

In addition, no vapor encroachment conditions (VECs) were identified during completion of a Tier 1 vapor encroachment screening (VES) following ASTM International, Designation: E2600-22, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* dated May 2022 (ASTM E2600-22).

1. Introduction

1.1 Purpose

This Phase I Environmental Site Assessment (Phase I ESA) was performed pursuant to AECOM Technical Services, Inc. (AECOM's) written proposal, dated October 30, 2024, and Contract No. 4600004507-Work Order No. 14, for the S13 Pump Station Facility identified by Broward County Parcel Identification Numbers (PINs) 5041-25-01-0490, 5041-25-01-0500, 5041-25-01-0700, 5041-25-01-0850 and 5041-25-01-0860, Davie, Broward County, Florida (herein referred to as the "subject property"). This assessment was performed in advance of the potential spillway improvements at the subject property.

The purpose of this Phase I ESA is to provide the client with information for use in evaluating recognized environmental conditions (RECs) associated with the subject property. Per ASTM International, Designation: E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21), potential findings can include RECs, historical RECs (HRECs), controlled RECs (CRECs), de minimis conditions (DMCs) and significant data gaps as follows:

- A REC is defined by the ASTM standard as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." The term includes hazardous substances or petroleum products even under conditions in compliance with laws.
- A HREC is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority and meeting unrestricted use criteria established by a regulatory authority or authorities without subjecting the subject property to any required controls.
- A CREC is defined as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (activity and use limitations or other property use limitations).
- DMCs are conditions related to a release that generally do not present a threat to human health or the environment and generally would not be subject to enforcement action if brought to the attention of the appropriate governmental agencies.
- A significant data gap is a data gap that affects the ability of the environmental professional to identify a REC.

In addition, a Tier 1 vapor encroachment screening (VES) is completed as part of this assessment. This screening is conducted in general accordance with ASTM International, Designation: E2600-22, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions dated May 2022 (ASTM E2600-22). The objective of the VES is to evaluate if a vapor encroachment condition (VEC) exists or if a VEC does not exist.

This Phase I ESA is based on a review of existing conditions, reported pre-existing conditions, and observed operations at the subject property and adjacent properties.

1.2 Scope of Work

The Phase I ESA included a site visit, interviews, regulatory research, historical review, and a review and an environmental database analysis of the subject property. In conducting the Phase I ESA, AECOM assessed the subject property for visible signs of possible contamination, researched public records for the subject property and adjacent properties (as applicable), and conducted interviews with persons knowledgeable about the subject property. Non-Scope Services per ASTM E1527-21 including, but not limited to, asbestos, lead paint, radon, floodplains and wetlands were not included in the scope of work. On April 17, 2024, EPA signed the final rule 20 to designate perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) collectively identified as per- and polyfluoroalkyl substances (PFAS) as hazardous substances under section 102(a) of CERCLA. This designation allows EPA to use its CERCLA enforcement authorities, as appropriate and where relevant statutory elements are met, which could shift the cost burden of CERCLA response costs from the Superfund to Potentially Responsible Parties (PRPs). As such, PFAS is now considered part of the ASTM standard scope and is included in this scope of work.

This project was performed in general accordance with ASTM E1527-21 and AECOM's proposal to the client, dated October 30, 2024. Conclusions reached in this report are based upon the assessment performed and are subject to limitations set forth in Sections 1.3, 1.4, and 1.5 below.

1.3 Study Limitations

This report describes the results of AECOM's Phase I ESA to identify the presence of conditions materially affecting the subject facility and/or property within the limits of the established scope of work as described in our proposal.

As with any due diligence assessment, there is a certain degree of dependence upon oral information provided by facility or site representatives, which is not readily verifiable through visual observations or supported by any available written documentation. AECOM shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed by facility or site representatives at the time this assessment was performed. In addition, the findings and opinions expressed in this report are subject to certain conditions and assumptions, which are noted in the report. Any party reviewing the findings of the report must carefully review and consider all such conditions and assumptions.

This report and the field data and notes were gathered and/or prepared by AECOM in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of AECOM's assessment of the subject property. The statements, findings and opinions contained in this report are only intended to give approximations of the environmental conditions at the subject property.

As specified in ASTM E1527-21, it is incumbent that the client and any other parties who review and rely upon this report understand the following inherent conditions surrounding any Phase I ESA:

- Uncertainty Not Eliminated - No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a subject property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a subject property, and this practice recognizes reasonable limits of time and cost. (Section 4.5.1 of ASTM E1527-21)
- Not Exhaustive - "All appropriate inquiries" does not mean an exhaustive assessment of a property. There is a point at which the cost of information or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of ASTM E1527-21)
- Comparison with Subsequent Inquiry – It should not be concluded or assumed that an investigation was not AAI merely because the inquiry did not identify RECs in connection with a subject property. ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent ESAs should not be considered valid standards to judge the

All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors. (Section 4.5.4 of ASTM E1527-21)

A similar set of inherent limitations exist in cases where the Phase I ESA included a screening-level assessment of vapor migration or vapor encroachment; such an assessment is a required part of a Phase I ESA when ASTM E1527-21 is employed. According to ASTM E2600-22, the following limitations apply:

- Uncertainty Not Eliminated in Screening - No VES can wholly eliminate uncertainty regarding the identifications of VECs in connection with the target property. Screening is intended to reduce, but not eliminate, uncertainty regarding whether or not a VEC exists in connection with the property. (Section 4.5.1 of ASTM E2600-22)
- Not Exhaustive - The guide is not meant to be an exhaustive screening. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions. One of the purposes of this guide is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing a VES and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of ASTM E2600-22)
- Comparison with Subsequent Investigations - It should not be concluded or assumed that an investigation was not adequate because the investigation did not identify VECs in connection with a property. The VES must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent VESs should not be considered valid bases to judge the appropriateness of any prior screening if based on hindsight, new information, use of developing technology or analytical techniques, or similar factors. (Section 4.5.4 of ASTM E2600-22)

This report was prepared pursuant to an agreement between South Florida Water Management District (SFWMD) (Client) and AECOM and is for the exclusive use of the Client. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without first obtaining AECOM's written consent and provided any such party signs an AECOM-generated Reliance Letter. A third party's signing of the AECOM Reliance Letter and AECOM's written consent are conditions precedent to any additional use or reliance on this report.

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions, which would render the report inaccurate. Reliance on this report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk.

1.4 Report Viability

According to ASTM E1527-21, an ESA "meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components presented in 4.6.2(i), (iii), (iv), and (v) for interviews, review of government records, visual inspections, and declaration by environmental professional, shall be identified in the report. Completion of searches for recorded environmental cleanup liens (4.6.2(ii)) is a user responsibility; however, if the user has engaged the environmental professional to conduct these searches, then that date shall also be identified in the report." The table below lists the dates of completion for pertinent components of this Phase I ESA.

Component	Date of Issuance/Completion
Interviews with Owners, Operators and Occupants	April 15, 2025
Environmental Database Report	March 17, 2025
Visual Inspection of the Subject Property and Adjoining Properties	April 15, 2025
Declaration by Environmental Professional	August 20, 2025
Issuance of Report	August 20, 2025

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

Report Viability Expiration Date*	September 13, 2025

* The 180-day viability date is based on the earliest referenced component noted in the table above.

1.5 Data Gaps

Per ASTM E1527-21:

- A data gap is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.
- A data gap is considered a significant data gap if other information and/or professional experience raises reasonable concerns involving the effects of that data gap on the ability of the environmental professional to render an opinion regarding whether conditions exist that are indicative of RECs or CRECs.

The following data gaps (to include site-specific limitations) were encountered during the course of this assessment:

- During the site visit, AECOM did not access the roofs of the pump station, control building, and the ancillary building. AECOM's evaluation of the subject property focused on areas where hazardous substances are handled. The site contact did not report any hazardous substances associated with the roof or within the building. Based on this information, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- Approximately 38% of the subject property is covered by water; therefore, not all areas were able to be observed/assessed. Based on the use of this portion of the subject property and a review of historical documents, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- As specified in the agreed upon scope of work, a title search and environmental lien search were not conducted as part of this Phase I ESA. The user was not aware of environmental liens or activity use limitations (AULs) that have been placed on the subject property. Based upon historical data collected from other sources, this data gap is not expected to be significant so that it would impact the results of this assessment.
- A data failure was encountered in determining the historical use of the subject property. The earliest source of historical information reasonably ascertainable within the time frame of this report in which usage could be determined was an aerial photograph from 1940. At the time of the photograph, the subject property appeared to be a canal and portions of agricultural row crops (a developed use per ASTM E1527-21). Therefore, the ASTM E1527-21 requirement to determine all obvious uses of the property from the present back to the property's first obvious developed use, or back to 1940, whichever is earlier, could not be achieved. However, based upon the identified land use, it is unlikely that there had been significant prior development; therefore, this data failure is not expected to be significant so that it would impact the results of this assessment.
- It should be noted that not all standard historical sources, as defined per ASTM E1527-21, were reviewed as part of this assessment. In addition to recorded land title records, building department records were not reviewed. Based on information provided from the remaining standard historical sources, additional historical information obtained from building department records would not likely have assisted in meeting the historical use requirement; therefore, this data gap is not expected to be significant so that it would impact the results of this assessment.
- Per ASTM E1527-21, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. AECOM was unable to interview past owners and/or operators at the subject property. However, based upon historical data collected from other sources, this data gap is not expected to be significant so that it would impact the results of this assessment.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

- Per the agreed scope-of-work and ASTM E1527-21, information related to certain site-specific items should be provided by the Phase I ESA report user to AECOM. To assist the user in gathering information that may be material to identifying RECs, AECOM provided the Client (the users) with the User Questionnaire from ASTM E1527-21; at this time the completed form has not been returned for inclusion in this report. However, this data gap is not expected to represent a significant data gap to this investigation, given the historical use of the subject property.
- AECOM submitted a Public Records Request (PRR) to the Davie Fire Rescue and Florida Department of Environmental Protection (FDEP) to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's PRR has not been received. Based on AECOM's research to date, AECOM does not anticipate the response (if any) from Davie Fire Rescue to our PRR will significantly alter the conclusions or recommendations of this report. However, if information is received from this PRR that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

2. Site Description

2.1 Site Location and Parcel Description

The subject property consists of approximately 12-acres of land and canal and is identified by Broward County PINs 5041-25-01-0490, 5041-25-01-0500, 5041-25-01-0700, 5041-25-01-0850 and 5041-25-01-0860. The subject property is located in Davie, Broward County, Florida. The subject property is an irregular shaped tract of land and canal that includes a pump station and gated spillway structure, S13, situated within the South New River Canal, approximately 215 feet west of State Road 7/US 441. The subject property is accessed from east via State Road 7/US 441 and from the north via Orange Avenue (northern property boundary). The approximate location of the subject property is illustrated on Figure 1 - Site Location Map.

2.2 Site Ownership

According to the Broward County Property Appraiser's records, the subject property is owned by SFWMD.

2.3 Site Visit

Ms. Kelsey Esteves with AECOM visited the subject property on April 15, 2025. The site visit included a visual inspection of the interior portions of the onsite buildings and structures, as well as the exterior portions of the subject property and the surrounding area. During the site visit, AECOM was accompanied by Mr. Josh Feltner, Leasing & Real Estate Support – Environmental Science Unit, of the SFWMD. Site-related limiting conditions encountered during this assessment were previously summarized in Section 1.5.

The site visit methodology consisted of walking over accessible areas of the subject property, including the building interior and exterior, the perimeter, and the portions of the surrounding area. The following sections summarize the results of the site visits.

2.3.1 Site and Facility Description

The approximate 12-acre subject property encompasses an estimated 4.6 acres of the South New River Canal, a pump station with a gated spillway structure, S13, a single-story control building that houses electrical equipment used to operate different features of the structure, and an ancillary storage building that houses two (2) emergency generators with 200-gallon diesel ASTs, a skid steer loader, coolants, lubricants, and other petroleum-based products for machine maintenance. Operations at this facility are normally controlled automatically but may be controlled manually during emergencies or for servicing.

The onsite structures are reinforced concrete with concrete block superstructure, equipped with three (3) 60-inch vertical propeller pumps. Each pump is powered by an in-line diesel engine complete with a 150-gallon diesel day tank. A 10,000-gallon AST containing diesel fuel was observed south of the pump station on the northcentral portion of the subject property. A refueling system allows the day tanks to be refilled by the 10,000-gallon AST. The refueling system is outfitted with a secondary containment pipeline. Two (2) ASTs, less than 500 gallons, were observed on the south-central portion of the subject property. SFWMD District personnel stated the ASTs are temporary tanks that are currently empty and not in use. They are connected to a portable pump system. District personnel stated the pump system may be utilized to assist in flood water mitigation. No leaks, discharges, distressed vegetation, or staining were observed or has been reported.

Additionally, two (2) stilling wells were observed north of the South New River Canal, one is west of the pump station and the other is east of the pump station. The wells are utilized to automatically record surface water elevations at a frequency designated by SFWMD. The wells are protected with a locked metal lid. No visual potable water wells, clarifiers, dry wells, septic tanks, or leach fields were observed during the site visit. No visual evidence of discolored soil, water, or unusual vegetative conditions or odors were identified during the site visit. In addition, no visual evidence of significant corrosion was identified on the floors or walls of the pump station or control buildings on the subject property. The general layout of the subject property is illustrated on Figure 2 - Site Plan and Representative Site Photographs are provided in Appendix A.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

2.3.2 Surrounding Properties

The subject property is located in a mixed-use area of residential and commercial properties within the city of Davie. State Road 7/US-441 cuts through the eastern portion of the subject property. The subject property is bordered to the northwest by Orange Drive followed by Versatile Warehousing, a business and storage facility and Broward Corporate Center and to the northeast by South Fork Canoe Launch, a recreational park maintained by Broward County, followed by a small lake. The subject property is bordered to the east by the South New River Canal. The subject property is bordered to the southwest by Griffin Gardens Apartments, Swaying Palms Mobile Home Park, and Jet Auto Commercial Plaza and to the southeast by a vacant lot followed by Corporate Coaches, a limousine service and followed by a Wendy's restaurant. The subject property is bordered to the west by the South New River Canal.

AECOM did not identify any gasoline service stations or dry cleaners in the immediate vicinity (500 feet) of the subject property. No sensitive receptors (i.e., day care centers, schools, hospitals) were identified as being located adjacent to the subject property. Based on AECOM's site reconnaissance of the surrounding neighborhood, no off-site sources of concern were identified.

2.3.3 Petroleum Products and Hazardous Materials

The following petroleum products were observed at the subject property during site reconnaissance.

- Six (6) 55-gallon capacity steel drums containing industrial gear oil were observed. The drums were stored atop a concrete floor within the ancillary storage building located on the southcentral portion of the subject property. No stains or leaks were visible in the vicinity. These containers do not represent a REC at this time.
- Ten (10) 55-gallon steel drums containing heavy duty diesel engine oil were observed. The drums were stored atop a concrete floor within the ancillary storage building on the southcentral portion of the subject property. No stains or leaks were visible in the vicinity. These containers do not represent a REC at this time.
- Numerous 5-gallon plastic buckets containing engine oil and 2.5-gallon F-style plastic jugs containing engine coolant were observed on shelves atop a concrete floor in the ancillary storage building on the southcentral portion of the subject property. No stains or leaks were visible in the vicinity. These containers do not represent a REC at this time.

Staining or visual evidence of a hazardous materials release was not observed at the time of the site visit.

2.3.4 Hazardous Waste

The following hazardous waste was observed at the subject property during site reconnaissance.

- One (1) 55-gallon steel drum containing used oil filters was observed atop a concrete floor within the ancillary storage building located on the southcentral portion of the subject property. No stains or leaks were visible in the vicinity. Additionally, this facility was listed on the Hazardous Waste and Broward County Hazardous Materials databases. Its current regulatory status is listed as in compliance. These containers do not represent a REC at this time.

2.3.5 Polychlorinated Biphenyls

Polychlorinated biphenyl (PCB)-containing dielectric fluids have been widely used as coolants and lubricants in transformers, capacitors, and other electric equipment due to their insulating and nonflammable properties. Based on the use of the site, PCBs are not expected to be present on-site.

Hydraulic equipment (transformers, trash compactors, lifts) was not identified on the subject property.

2.3.6 Aboveground Storage Tanks

One (1) 10,000-gallon AST containing diesel fuel located within a secondary containment structure was observed on the southcentral portion of the subject property, south of the South New River Canal. The AST provides diesel

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

fuel for the pump station's stationary compression ignition engines that power water pumps for flood control. No leaks or discharges were observed or have been reported. The presence of this AST is not considered a REC.

Three (3) 150-gallon diesel day tanks were observed within the pump station situated within the South New River Canal in the central portion of the subject property. The day tanks power the three (3) vertical propeller pumps. The 10,000-gallon AST refills the day tanks utilizing an automatic pipeline refueling system. The refueling system is outfitted with a secondary containment pipeline. No leaks or discharges were observed or have been reported. The presence of these ASTs is not considered a REC.

Two (2) 200-gallon double walled diesel ASTs associated with two (2) emergency generators located within the ancillary storage building were observed on the southcentral portion of the subject property. No leaks or discharges were observed or have been reported. The presence of these ASTs is not considered a REC.

Two (2) ASTs, less than 500 gallons each, were observed on the south-central portion of the subject property. SFWMD District personnel stated the ASTs are temporary tanks that are currently empty and not in use. They are connected to a portable pump system. District personnel stated the pump system may be utilized to assist in flood water mitigation. No leaks, discharges, distressed vegetation, or staining were observed or has been reported. The presence of these ASTs is not considered a REC.

2.3.7 Underground Storage Tanks

Underground storage tanks (USTs) were not observed on the subject property during the site visit. In addition, no USTs were listed in the site-specific environmental database report reviewed by AECOM or otherwise identified during AECOM's review of historical aerial photographs.

2.3.8 Solid Waste

Eight (8) trash rakes are installed west of the pump station within the South New River Canal. The trash rakes remove debris within the canal and the debris moved to a designated area, south of the trash rake structure. The frequency of removal is dependent on the amount of debris within the waterway. SFWMD coordinates with Broward County Waste Management for removal.

2.3.9 Water

No potable or irrigation water wells were observed at the subject property. The subject property is connected to a municipal water supply maintained by the Town of Davie Utilities.

2.3.10 Wastewater

Due to the lack of activities on-site, no wastewater is currently generated on the subject property.

2.3.11 Stormwater

Stormwater from the subject property appears to drain via sheet flow to the stormwater drains located throughout the subject property. The subject property is likely connected to the municipal stormwater sewer system. No staining was observed in the vicinity of the storm drains.

2.3.12 Heating and Cooling

The on-site spillway structure and ancillary storage building are equipped with heating or cooling services provided by Florida Power & Light.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

3. Environmental Setting

3.1 Topography

The United States Geological Survey (USGS) 7.5-minute topographic map of the Fort Lauderdale South, Florida quadrangle and a review of the Google Earth application indicate that the subject property elevation ranges from approximately 0 to 4 feet above mean sea level (amsl). Approximately 4.6 acres of the 12-acre site consist of the South New River Canal. However, the remaining subject areas are developed and surface water runoff from the subject property is likely diverted to man-made drainage systems.

3.2 Soil/Geology

Site-specific geologic information was not identified during the course of this assessment; however, according to state and regional geologic sources, the subject property lies within the Gold Coast - Florida Bay Physiographic District. This is the area of south and southeastward sluggish drainage from Lake Okeechobee. The rocks and sediments are Pleistocene aged and are largely limestones or limestone cap rocks. The sub classification of the area in which the subject property is located is the Everglades Subdistrict. This subdistrict consists of a freshwater marsh with varying thickness of peat and muck. Within the Everglades Subdistrict are three (3) geologically distinct sections. The subject site lies within the Andytown Ridges and Sloughs. This is an area where elevations are generally 15 feet or less, and the peat is less thick than in other portions of the northern Everglades.

Surface soils at the subject property are mapped as the Urban Land, Matlacha, limestone substratum-urban land complex, Margate fine sands, Lauderhill muck, and Arents, organic substratum-Urban land complex. Urban Land consists of areas that are more than 70 percent covered by airports, shopping centers, parking lots, large buildings, streets and sidewalks, and other structures, so that the natural soil is not readily observable. Unoccupied areas of this land type, mostly lawns, parks, vacant lots and playgrounds, consist of soils in the Hallandale, Margate, Immokalee, and Basinger series that have been altered by fill material spread on the surface to an average thickness of about 12 inches. These unoccupied areas are in tracts too small to be mapped separately. The fill is mostly sandy material, some of which contains limestone and shell fragments. Matlacha, limestone substratum-urban land complex consists of nearly level Matlacha gravelly fine sand and areas of Urban land. The areas of Matlacha soils and Urban land are so intermingled that they cannot be separated at the scale used for mapping. Typically, the surface layer of Matlacha soils is about 40 inches of light gray, gray, very pale brown, grayish brown, very dark grayish brown, and dark gray mixed gravelly fine sand and sandy material. The surface layer contains lenses of loamy sand and coated sandy fragments of former soil horizons with about 25 percent coarse fragments of limestone and shell. Margate fine sand is a nearly level, poorly drained, sandy soil that is underlain by limestone at a depth of 20 to 40 inches but has solution holes as deep as 60 inches. It is on nearly level, low terraces between the Everglades and the low, sandy Atlantic Coastal Ridge. Included with this soil in mapping are small areas of Basinger fine sand and Plantation much, and small areas of soils that have up to 8 inches of organic material on the surface. Also included are some areas of soils that are similar to Margate fine sand but have a very dark gray or black surface layer less than 6 inches thick to a dark gray or gray surface layer 3 to 6 inches thick. The natural vegetation consists of native grasses, waxmyrtle, and a few cypress trees. Lauderhill muck is a nearly level, very poorly drained, organic soil underlain by limestone at a depth of 20 to 40 inches. Lauderhill muck is found in broad flats in the Everglades. Included with this soil are small areas of Dania muck and small areas of soils that have organic material 36 to 51 inches thick over limestone. Also included are small areas of Okeelanta muck. Arents, organic substratum – Urban land complex consists of Arents, organic substratum, in open areas and of Urban land, or areas covered by concrete and buildings. About 50 to 70 percent is Arents, and about 30 to 50 percent is Urban land. The areas of these components are so intermixed or so small that to map them separately at the scale used was impractical. Slopes are 0 to 5 percent. The Arents, organic substratum, are found in open areas that are used for lawns, vacant lots, parks, and playgrounds or are unused. Urban land consists of streets, sidewalks, parking lots, buildings, and other construction areas where the soil is covered and cannot be readily observed. Arents are nearly level or gently sloping, somewhat poorly drained to moderately well drained, heterogeneous sandy materials about 20 to 50 inches thick that have been spread over the natural soils to make them suitable for urban development.

All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

The underlying natural soil can generally be identified in places where the overburden material is less than about 30 inches thick (USDA, 1984).

3.3 Groundwater/Hydrology

Site-specific hydrologic information was not identified during the course of this assessment. Based on topography and geologic conditions, uppermost groundwater likely occurs within 3 to 4 feet of the ground surface at the subject property (USGS, 1995). The Uppermost groundwater flow direction likely follows local topography generally southeast and towards the South New River Canal. It should be noted that the actual depth and flow direction of groundwater beneath the subject property cannot be determined without site-specific groundwater monitoring well data.

All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

4. Site and Area History

Historical information for the subject property and surrounding properties is based on AECOM's review and analysis of the following historical sources:

- Aerial photographs dated 1940, 1947, 1952, 1958, 1961, 1968, 1971, 1976, 1981, 1988, 1992, 2007, 2010, 2015, and 2019;
- Google Earth aerial images dated 1994, 1999, 2002 through 2008, 2010, 2011, 2013 through 2024;
- Topographic maps dated 1949, 1962, 1970, 1983, 1994, 2012, 2015, 2018, and 2021;
- City directories for the years 1973, 1979, 1980, 1985, 1990, 1992, 1995, 1999, 2000, 2005, 2010, 2014, 2017, and 2020;

Building Department records were not reviewed during the course of this assessment. According to EDR, Sanborn® Fire Insurance Map coverage is not available for the subject property. Copies of the historical documents/reports are provided in Appendix B.

4.1 Subject Property

AECOM's historical review indicates that the subject property was developed with the South New River Canal extending east to west through the center subject property. An unimproved dirt road (present-day State Road 7/US 441) cuts through the eastern portion of the subject property and agricultural row crops are depicted on the south-central portion of the subject property from at least 1940. Additionally, a small canal parallel and west of the dirt road is depicted. By at least 1952, disturbed land is depicted north of the South New River Canal and east of the State Road 7/US 441 on eastern portion of the subject property. By at least 1958, the small canal parallel to State Road 7/US 441 is no longer depicted and State Road 7/US 441 has been widened and paved. The S-13 pump station is depicted west of the State Road 7/US 441. A small, U-shaped channel has been constructed south of the pump station creating a small peninsula of land that extends west from State Road 7/US 441. A dirt road extending east from State Road 7/US 441 and disturbed land and/or a staging area is depicted north of the South New River Canal on eastern portion of the subject property. By at least 1961, two (2) finger channels extending south from the South New River Canal are depicted west of the S-13 pump station. The piece of land between the two finger channels has been cleared and grubbed. By at least 1968, the peninsula of land has been cleared and grubbed, and a marina is depicted east of State Road 7/US 441 and south of the South New River Canal. Additionally, the small portions of land in that area have been cleared and appear to be part of the marina. By at least 1971, additional land clearing is depicted west of the two finger canals. By at least 1992, the staging area on the northeast portion of the subject property is no longer depicted. A small channel is depicted north of the South New River Canal and east of State Road 7/US 441. The channel extends north then east, beyond the subject property boundaries. By at least 1999, a paved entryway and parking lot are depicted on the peninsula south of the pump station. By at least 2002, the 10,000-gallon AST is depicted south of the S-13 pump station, on the northern portion of the peninsula. By at least 2004, the trash rake structure situated within the South New River Canal is depicted west of the S-13 pump station. By 2014, construction activities are depicted within the peninsula. By at least 2015, the control building, the ancillary storage building, and canal bank stabilization improvements are depicted on the peninsula. By at least 2016, two (2) stilling wells are depicted north of the South New River Canal, one is west of the pump station and the other is east of the pump station. By at least 2017, a dirt road is depicted parallel and south of the South New River Canal on the southwestern portion of the subject property. The dirt road extends west outside of the subject property boundaries. By at least 2023, the previously depicted marina on the southeastern portion of the subject property, south of the South New River Canal has been demolished and backfilled, and redevelopment activities and canal stabilization are depicted. The subject property has remained in its current configuration (as observed during AECOM's site visit) since at least 2023. No recognized environmental conditions (RECs) were identified based on the historical review.

All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

4.2 Adjoining Properties and Surrounding Area

The 1940 historical aerial depicts the northern adjoining property to consist of agricultural land. Two (2) unimproved dirt roads are depicted, one extends north-northwest (present-day State Road 7/US 441) on the eastern portion of the northern adjoining property and the second road (present-day Orange Drive) extends west starting from State Road 7/US 441. Additionally, a small canal extending north-south is depicted west and parallel to State Road 7/US 441. By at least 1947, two (2) residential homes are depicted on the western portion of the northern adjoining property. By at least 1952, an unimproved dirt road (present-day Southwest 47th Avenue) is depicted east of the residential homes extending north from Orange Drive. By at least 1958, the narrow canal has been backfilled and disturbed land and/or a staging area is depicted on the eastern portion of the northern adjoining property. Additional residential homes are depicted north of the northern adjoining property and road improvements to State Road 7/US 441, such as widening, are depicted. By at least 1968, a narrow canal is depicted between Southwest 47th Avenue and State Road 7/US 441, extending north. By at least 1976, construction activities are depicted west of Southwest 47th Avenue. By at least 1981, numerous business and storage warehouse buildings are depicted west of Southwest 47th Avenue. Additionally, one (1) previously depicted residential home has been razed and land clearing activities are depicted. By at least 1988, a narrow lot on the western portion of the northern adjoining property appears to be a storage facility for apparent Conex containers and automobiles and the present-day Broward Corporate Center is depicted. Additionally, land clearing, apparent mining activities, and borrow lakes are depicted on the northwest portion of the northern adjoining property. By at least 1992, the mining activities are no longer depicted, and a lake is present on the western portion of the northern adjoining property. Additionally, the narrow piece of land between the Conex container storage facility and the warehouse property has been developed with a single rectangular building. By at least 2002, the present-day South Fork Canoe Launch, a recreational park is depicted southwest of the lake. Since at least 2002, the northern adjoining properties have remained in its current configuration (as observed during AECOM's site visit).

The South New River Canal extends east, northeast from the subject property in the 1940 historical aerial photograph. Agricultural land is depicted south and north of the canal on the properties adjacent east of the subject property. By at least 1947, land has been cleared, and multiple small buildings are depicted northwest of the canal. By at least 1958, additional land has been cleared and added buildings are now depicted northwest of the canal. The facility appears to be a distribution center with apparent barges within the canal and containers staged within the property. South of the canal, numerous residential homes are depicted. By at least 1961, additional land clearing is apparent south of the canal. By at least 1968, an apparent marina is depicted southeast portion of the eastern adjoining property and additional residential homes are depicted east of the marina. Additionally, the containers previously staged north of the canal are no longer depicted. The area remains generally unchanged until at least 1992, when the former distribution facility north of the canal is no longer depicted and the present-day Wheelabator South Broward building has been constructed. By at least 2002, boat storage is depicted on the property east of the marina on the southern portion of the canal. By at least 2017, the boat storage area has been emptied and the eastern adjoining properties have remained in its current configuration (as observed during AECOM's site visit).

Historic aerial photographs depict the area south of the subject property developed with agricultural land and an unimproved dirt road (present-day State Road 7/US 441) extending south. Additionally, a small canal extending north-south is depicted west and parallel to State Road 7/US 441. By at least 1947, residential homes are depicted south of the southern adjoining property. By at least 1958, the narrow canal has been backfilled and east of State Road 7/US 441, a rectangular building with small pond and circular driveway is depicted. By at least 1961, two (2) finger channels extending south from the South New River Canal are depicted west of State Road 7/US 441 and the construction of the present-day Swaying Palms Mobile Home Park, a residential community, is depicted on the land between the two finger channels. By at least 1968, additional residential development is apparent throughout the south-central area on the southern adjoining property. Additionally, east of State Road 7/US 441, a commercial property, a marina and prefabricated residential community are depicted. By at least 1971, additional residential development depicted west of the finger channel. By at least 1976, additional commercial development is depicted east of State Road 7/US 441. Additionally, disturbed land, a pond and dirt road are depicted east of the residential community, east of State Road 7/US 441. By at least 1981, vegetation has been cleared, and the pond has been partially backfilled. By at least 1988, the present-day Griffin Gardens Apartments complex is depicted on the

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

southwestern portion of the southern adjoining property and the present-day Jet Auto Commercial Plaza east of State Road 7/US 441 is depicted. By at least 2002, a commercial building east of State Road 7/US 441 is no longer depicted and numerous white storage containers occupy the area. By at least 2008, the white storage containers are no longer depicted and the area is vacant. By at least 2010, numerous limousines are depicted by the present-day occupant, Corporate Coaches, a limousine service. By at least 2019, additional commercial development is depicted south of the southern adjoining property and east of State Road 7/US 441. Since at least 2019, the southern adjoining properties have remained in their current configuration (as observed during AECOM's site visit).

The South New River Canal extends west from the subject property in the 1940 historical aerial photograph. Agricultural land is depicted south and north of the canal on the properties adjacent west of the subject property. By at least 1958, Florida's Turnpike, extending north-south, is depicted approximately ¼ mile west from the western subject property boundary. Griffen Road is depicted southwest of the subject property and Hacienda Boulevard is depicted north of Orange Drive, extending north. By at least 1961, disturbed land is depicted west of Griffen Road. By at least 1971, staged truck trailers are depicted adjacent southwest of Griffen Road. By at least 1988, road improvements, such as lane widening, to Florida's Turnpike are depicted. By at least 1992, on ramps and exit ramps from Griffen Road to the Florida's Turnpike are depicted. By at least 1999, the land west of Hacienda Boulevard and east of Florida's Turnpike has been cleared. By at least 2002, staged truck trailers are depicted west of Hacienda Boulevard and east of Florida's Turnpike. Additionally, a large commercial office building is depicted east of Hacienda Boulevard and north of Orange Drive. By at least 2004, the SFWMD gate south of the South New River Canal and north of Griffin is depicted along with an unimproved dirt road, parallel to the canal. By at least 2017, construction activities are depicted south of the South New River Canal and southwest of the subject property. By at least 2018, Staybridge Suites Hotel, a pond, and associated parking lot is depicted. Since at least 2018, this area has remained in its current configuration (as observed during AECOM's site visit).

No historical off-site sources of concern were identified.

4.3 Previously Prepared Environmental Reports

AECOM inquired about existing environmental reports associated with the subject property. Previously prepared environmental reports were not identified during this assessment, nor were they provided by the Client for review.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

5. Database and Records Review

5.1 User Provided Information

Section 6 of ASTM E1527-21 states that certain tasks, which will help to determine the possibility of RECs associated with the subject property, are generally conducted by the Phase I ESA report user. This includes the following: reviewing title records for environmental liens or activity and land use limitations and considering awareness of any specialized knowledge (e.g., information about previous ownership or environmental litigation), experience related to RECs at the subject property, or significant reduction in the purchase price of the subject property. Per the agreed scope-of-work, information related to these items should be provided by the Phase I ESA report user to AECOM. To assist the user in gathering information that may be material to identifying RECs, AECOM has provided the Client (the users) with the User Questionnaire from ASTM E1527-21; however, at this time the completed form has not been returned for inclusion in this report. This data gap is not expected to represent a significant limitation to this investigation based on other documentation reviewed as part of the Phase I ESA.

5.2 Land Title and Judicial Records for Environmental Liens and Activity and Use Limitations

Information pertaining to chain-of-title, environmental liens or activity and use limitation was not provided to AECOM by the User (i.e., the client), nor was AECOM contracted to obtain information pertaining to chain-of-title, environmental liens or activity and use limitations. Environmental agency databases as provided by EDR show no indication of deed restrictions or activity and use limitations due to a release of hazardous materials.

5.3 Database Information

In accordance with the scope of work and ASTM E1527-21, a search of various governmental databases was conducted by EDR. The site-specific environmental database report was reviewed to evaluate if soil and or groundwater from on-site and/or off-site sources of concern has the potential to impact the subject property. The database abbreviations are provided in the site-specific environmental database report. It should be noted that this information is reported as AECOM received from EDR, which in turn reports information as it is provided in various government databases. It is not possible for either AECOM or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence.

The database report includes various reports detailing database information for each of the sites identified/geocoded within the specified radius. Three (3) additional sites were identified within the database report; however, EDR was not able to map them to specific locations due to insufficient/contradicting address information. These sites were included in the database report as "orphan" sites. A summary of AECOM's review and analysis of site-specific environmental database report is presented below. A copy of the EDR database report is provided in Appendix C.

Based on AECOM's research, the subject property is not located on or within a 1-mile radius of tribal lands.

5.3.1 Subject Property

The subject property was identified on the AST, Hazardous Waste, Florida Aerometric Information Retrieval System (FL AIRS), Financial Assurance, Broward County Hazardous Materials databases with FDEP Facility IDs (Nos.) 8622542, 220920, 112780, and 02279. According to the available regulatory information reviewed, the subject property formerly maintained a 3,000-gallon AST that contained diesel fuel for an emergency generator. The AST was removed from the site in August 1994 and no discharges were reported. Currently, this facility maintains a 10,000-gallon double wall steel AST containing diesel fuel. The AST is within a concrete containment area with a closed drainage system. No leaks or spills were observed on or around the tank during site reconnaissance. Additionally, no discharges have been reported. The subject property also maintains three (3) 150-gallon diesel day

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

ASTs that fuel the pump station's vertical propeller pumps. The day tanks are refueled via an automatic aboveground pipeline refueling system. The refueling system is outfitted with a secondary containment pipeline. No leaks or discharges were observed or have been reported. According to the available information reviewed, a Diesel Fuel Lines Closure Report was performed by CEI Engineers and Contractors (CEI) dated July 2016. The CEI report states that the former aboveground and underground diesel fuel lines associated with the 10,000-gallon AST were removed. Prior to removal, the fuel lines were cleared of residual fuel and a pressure test was conducted to ensure the integrity of the lines. The fuel lines were excavated and removed from the subject property, with the exception of an approximate eight-foot section that was left in place due to electrical conduit that is located above the fuel lines. The left in place lines were cut, filled, and capped. CEI stated during the removal, no petroleum odors or soil staining was detected. This facility maintains an Air General Permit for its three (3) reciprocating internal combustion engines located within the S-13 Pump Station and therefore is registered on the FL AIRs database. According to the most recent Broward County Hazardous Material Management Facility Inspection Report, the facility's current regulatory status is listed as in compliance. Based on the lack of a documented discharge and its current regulatory status, these listings are not considered a REC to the subject property, in AECOM's opinion.

5.3.2 Surrounding Sites

According to the environmental database report, numerous sites (over 50) were identified within their respective ASTM E1527-21 and/or EDR search distances from the subject property. Based on AECOM's review of these database listings, none of these sites are expected to present a REC to the subject property based on their distance from the subject property, regulatory status (i.e., closed, no violations found), media impacted (i.e., soil only), and/or topographical position from the subject property (i.e., down-gradient or cross-gradient). Due to its proximity to the subject property, the following site is discussed in additional detail:

- Gexhaust/Jet Exhaust, 4641 State Road 7, Facility ID's: 110070815028 and FL0000747964, located approximately 100 feet south of the subject property. This site is listed on the Resource Conservation and Recovery Act (RCRA) Non-Generators/No Longer Regulated (NLR), Facility Index System (FINDS), Enforcement & Compliance History Information (ECHO) databases. The EDR incorrectly mapped this facility to the subject property. After further review, the address is located approximately 100 feet south of the subject property. According to the available regulatory information review, this facility repairs auto exhaust systems. No violations, or areas of concern were found by the FDEP or on EPA's ECHO database. Additionally, an FDEP Hazardous Waste Inspection Report stated that this facility does not generate hazardous waste. Given the lack of a reported discharge, this listing is not considered a REC, in AECOM's opinion.
- Sez Marine, Formerly Reagon Marine, 4600 Southwest 44th Avenue, Facility ID's: ERIC_8656, 03232, and ERIC_15314, located approximately 175 feet southwest of the subject property. This site is listed on the Florida Institutional Controls, Florida Division of Waste Management Contamination (DWM CONTAM), Florida Environmental Restoration Integrated Cleanup (ERIC Waste Cleanup), Florida Responsible Party Site Listings (FL RESP Party), Integrated Compliance Information System (ICIS), FINDS, ECHO, and Broward County Hazardous Materials (BC HM) databases. According to the available information reviewed, in 2015, due diligence activities were conducted at the site as part of a property transaction. Assessment activities identified arsenic and total recoverable petroleum hydrocarbons (TRPH) impacts to soil and arsenic impacts to groundwater. Additional assessments, including a Site Assessment Report (SAR) and Source Removal Report (SRR) were completed in September 2016. Impacted soils were excavated and properly disposed. Confirmation sampling documented the completeness of the excavation activities. Monitoring wells were installed to delineate the shallow arsenic plume. No Further Action (NFA) was approved for soil in November 2016 and a Natural Attenuation Monitoring Plan related to groundwater was approved and implemented. Four (4) quarterly monitoring events documented the arsenic plume was stable and not migrating offsite. A Declaration of Restrictive Covenant was prepared and executed in 2019 and the site was granted NFA with Conditions (NFAC). The most recent assessment completed was a Groundwater Monitoring Report (GMR) and Request for No Further Action (NFA) dated August 2024. Two (2) groundwater monitoring events were conducted, one in February 2024 and the second in July 2024. Arsenic was reported below the groundwater cleanup target level (GCTL) of 10 micrograms per liter (µg/L). Correspondence from Broward County Resilient Environment Department, dated September 25, 2024, stated the site was not granted NFA status due to

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

missing information in the report, i.e. a complete site history, and past and present monitoring well construction details. Although the NFA without Conditions status was not granted, the site currently maintains an NFA with Conditions. This listing is not considered an offsite REC, in AECOMs opinion.

- Jet Lubrication/Hi Tech Lube, 4681 South State Road 7, Facility ID's: 8945298: This site is located approximately 300 feet south of the subject property. This site is listed on the Underground Storage Tank (UST), Leaking UST (LUST), UST Finder, UST Finder Release, AST, DWM CONTAM, Financial Assurance, BC HM, BC Nov. According to the available information review, this facility reported a discharge in January 1993 in response to waste oil discovered in a monitoring well. A SRR and SAR were submitted in July and August 1995, respectively. The discharge was closed with an NFA in September 1995. The site currently maintains three (3) ASTs; one 2,000-gallon AST containing used oil, and two (2) 1,000-gallon ASTs containing new oil. The most recent FDEP Storage Tank Inspection Report states no evidence of any discharges were observed and listed the facility's status as 'in compliance'. Given the NFA status for the reported discharge and the current regulatory status of this facility, this listing is not considered an offsite REC, in AECOMs opinion.
- Wheelabrator South Broward Inc/ South Broward County Resource Recovery Ash Monofill, 4400 State Road 7, Facility ID's: 8945468, 204665, 05317, 53209, and FLR000169292, located approximately 500 feet northwest of the subject property. This site is listed on Hazardous Waste, Hazardous Waste Generator, UST, LUST, AST, DWM CONTAM, Financial Assurance, E Manifest, RCRA-NonGen/NLR, RCRA-Very Small Quantity Generator (VSQG), UST Finder, UST Finder Release, National Pollutant Discharge Elimination (NPDES), and Solid Waste Facility/Landfill (SWF/LF) databases. This facility is a processable waste to energy facility that began commercial operations in August 1991. All ash generated by the facility is disposed in an ash monofill located on the northern portion of the property, approximately 2,200 feet from the subject property. The entire monofill area includes a liner system composed of two (2) high density polyethylene (HDPE) geomembranes separated by a clay layer and underlain by a layer of sand and a layer of crushed and compacted limestone fill. Additionally, the facility is equipped with a leachate collection system. The leachate discharges into a holding tank. The geomembrane and leachate collection system are designed to prevent infiltration of stormwater from the monofill. This facility has a network of 26 groundwater monitoring wells located throughout the site. The wells are installed at depths within the surficial aquifer, ranging from 25 feet (ft) below grade (bg) to 105 ft bg. As part of this facility's regulatory requirements, groundwater and surface water samples are monitored semi-annually. Results from the most recent sampling event dated December 11, 2024, indicate vinyl chloride was detected in groundwater samples collected from the northern portion of this facility (approx. 3,500 feet north of the subject property) above the primary drinking water standard (PDWS) of 0.001 milligrams per liter (mg/L). According to the report, vinyl chloride in this area has been attributed to upgradient off-site sources, and the concentrations have been decreasing since October 2022. Benzene was detected above the PDWS of 0.001 milligrams per liter (mg/L) in two wells in the north central area of this site (approximately 2,400 feet from the subject property). No exceedances of applicable regulatory criteria were detected in the surface water samples collected from the South New River Canal. This facility formerly maintained four (4) 800-gallon USTs and were removed in August 1989. The site currently maintains three (3) ASTs; an 8,000-gallon AST and a 4,100-gallon AST containing mineral acid and a 5,000-gallon AST containing a hazardous substance. The most recent FDEP inspection report states this facility's regulatory status with regards to the ASTs as in compliance. Six (6) discharges have been reported at this facility with dates ranging from October 1991 to the last one reported in August 2011. Source removal activities for each discharge were completed with confirmation sampling, FDEP site inspections, and correspondence from Broward County granting NFA. Given the distance from the monitoring wells that have exceedances and the NFA regulatory statuses of the reported discharges, this listing is not considered an offsite REC, in AECOM's opinion.

5.4 Vapor Encroachment Screening

AECOM conducted a Tier 1 VES as part of this assessment. This screening was conducted in general accordance with the ASTM E2600-22. The objective of the VES was to determine if a VEC exists or if a VEC does not exist.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

5.4.1 Subject Property

No on-site sources of vapor encroachment (e.g., UST, contaminated soil, groundwater plume, etc.) were identified during this assessment. Based on this information, a VEC due to an on-site source does not appear to exist.

5.4.2 Off-site

To conduct the VES of the nearby area, AECOM conducted a detailed review and analysis of the site-specific environmental database report with particular focus on the follow two types of sites:

1. Off-site properties that are impacted by chlorinated volatile organic compounds (CVOCs) and/or semi-volatile-organic compounds (SVOCs) and are located within approximately 1,750 feet of the subject property, and
2. Off-site properties that are impacted by petroleum hydrocarbons and are located within approximately 525 feet of the subject property.

The following paragraph summarizes the results of AECOM's VES of the nearby area.

A review of the site-specific environmental database indicates that 1 CVOC/SVOC and 4 petroleum hydrocarbon impacted sites are located with the above-described radii of the subject property. However, the 5 sites can be ruled out due to their regulatory status (i.e., regulatory closure has been issued), media impacted (i.e., soil only), and/or topographical position from the subject property (i.e., down-gradient or cross-gradient). Based on this information, it is AECOM's opinion that a VEC at the subject property due to an off-site source does not appear to exist.

5.4.3 Local

AECOM submitted a Public Records Request to Davie Fire Rescue on March 24, 2025, to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's PRR has not been received. Based on AECOM's research to date, AECOM does not anticipate the response (if any) from Davie Fire Rescue to our Public Records Request will significantly alter the conclusions or recommendations of this report. However, if information is received from this PRR that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

5.4.4 County

AECOM reviewed the Broward County Property Appraiser's and ENVIROS online databases for records pertaining to the subject property's physical and parcel addresses. No records were identified for the subject property physical and parcel addresses.

5.4.5 State

AECOM submitted a Public Records Request to the FDEP on March 24, 2025, for information pertaining to the generation, transportation, storage, treatment and/or disposal of hazardous waste as well as any historical petroleum or chemical releases, leaking petroleum tanks, environmental assessment activities, and/or notices of violation that may have occurred on the subject property. No information was received during the time frame of this assessment. AECOM searched the FDEP Nexus Information Portal online database.

5.4.6 Federal

AECOM searched the United States Environmental Protection Agency's (US EPA's) Envirofacts and Superfund Enterprise Management System (SEMS) online databases. The SEMS database replaced the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) which has since been retired. SEMS includes the same data fields and content as CERCLIS. The Envirofacts database retrieves information

obtained from 17 national systems, including the CERCLIS, Superfund program (NPL sites), hazardous waste sites, and potentially hazardous waste sites. The subject property was not listed on the Envirofacts or SEMS databases.

6. Findings and Opinions

AECOM performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM E1527-21, which meets the requirements of Title 40, Code of Federal Regulations Part 312 and is intended to constitute *all appropriate inquiry* for purposes of the landowner liability protections. Any exceptions to, or deletions from, this practice are described in Section 1.3 through 1.5 of this report.

The following sections summarize the findings of this Phase I ESA and the opinions of the environmental professional.

6.1 Recognized Environmental Conditions

Based on the above-described activities, no RECs were identified in connection with the subject property.

6.2 Controlled Recognized Environmental Conditions

Based on the above-described activities, no CRECs were identified in connection with the subject property.

6.3 Historical Recognized Environmental Conditions

Based on the above-described activities, no HRECs were identified in connection with the subject property.

6.4 Vapor Encroachment Conditions

Based on the above-described activities, no VECs were identified in connection with the subject property.

6.5 De Minimis Conditions

Based on the above-described activities, no DMCs were identified in connection with the subject property.

6.6 Significant Data Gaps

ASTM E1527-21 requires the environmental professional document significant data gaps, as well as any exceptions to, or deletions from the ASTM Practice E1527-21. A significant data gap is a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

Based on the above-described activities, no significant data gaps were identified during this Phase I ESA.

7. Conclusions

AECOM has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the S13 Pump Station Facility identified by Broward County PINs 5041-25-01-0490, 5041-25-01-0500, 5041-25-01-0700, 5041-25-01-0850 and 5041-25-01-0860, Davie, Broward County, Florida, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

8. Environmental Professional Statement

Mr. Madabhushi was the Environmental Professional (EP) for this project. Mr. Madabhushi's EP statement is below and his resume is provided in Appendix D:

I declare that, to the best of my professional knowledge and belief, I meet the definition of an EP as defined in §312.10 of 40 Code of Federal Regulations (CFR) and that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

STRUCTURE S-13

This structure is a pumping station with a gated spillway which can control flows which bypass the pumps. The structure is located in Canal 11 (South New River Canal) about 300 feet west of U.S. Highway 441 and 5½ miles southwest of Fort Lauderdale and is a reinforced concrete structure with concrete block superstructure. The pumping station is equipped with three Fairbanks Morse 60-inch Figure 6310W vertical propeller pumps each having a rated capacity of 180 c.f.s. at a 4-foot static head. Each pumping unit is driven through a Bradfoot Gear Works 2-stage right-angle reducer by a Detroit Diesel V-71 285 horsepower in-line diesel engine. At the south side of the station, there is a 16-foot wide by 11-foot high vertical lift gate which is raised or lowered by means of Baldor 3 Phase stem hoists. Operation of the gate hoist is normally controlled automatically but may be controlled manually during emergencies or for servicing. Other equipment includes a Wright 5-ton manually operated overhead bridge crane for general maintenance and a dual water stage recorder.

PURPOSE

The purpose of the structure is to release flood runoff from, prevent overdrainage of, and saltwater intrusion into the agricultural area served by Canal 11 (South New River Canal) west of the structure.

The purpose of the pumping units in the structure is to pump surplus water through Canal 11 from the agricultural area west of the structure at the rate of 3/4 inch per day from the tributary drainage area, so as to keep water level in the canal west of the structure at optimum elevation of 2.2 feet above mean sea level, insofar as practicable.

The purpose of the gated spillway in the structure is to release runoff from, prevent overdrainage of, and prevent intrusion of salt water into the agricultural area west of the structure.

OPERATION

This structure will be operated to maintain an optimum headwater elevation of 1.6 feet, when sufficient water is available to maintain this level.

Spillway Operation

The automatic controls on the spillway will function as follows:

When the headwater elevation rises to elevation 1.8 feet, the gate will open;

When the headwater elevation falls or rises to elevation 1.6 feet, the gate will become stationary;

When the headwater elevation falls to 1.4 feet, the gates will close.

In addition to maintaining optimum upstream freshwater control as described above, the automatic gate controls on this structure have an overriding control which closes the gates, regardless of the upstream water level in the rare event of a high flood tide, whenever the differential between the head and tailwater pool elevations reaches 0.2 feet.

A special timing device has been installed at this site to protect manatees during automatic gate operation. During this operation when the upstream float sensor indicates that the gate should open, the gate opens a minimum of 2.5 feet. If this opening results in a headwater stage below the gate close level, as it often does, the gate will begin to close and the normal automatic operation will take control.

Pump Operations

The pumps shall be operated whenever water level in Canal 11 westerly of the structure exceeds the optimum elevation of 2 1/2 feet above mean sea level and water level easterly thereof is less than 8 feet above mean sea level. In addition, the pumps will be used when either excessive rainfall and/or high tides are predicted which could compromise gravity operation. The manually controlled pumping units shall be started and stopped slowly, one at a time, so that surges do not occur in the canal.

FLOOD DISCHARGE CHARACTERISTICS

	Pump Design	Gravity Design
Discharge Rate	540 cfs	540 cfs
	* % SPF	* % SPF
Headwater Elevation	2.2 to 2.5 ft.	1.2 feet

Tailwater Elevation	6.2 to 6.5 ft.	1.0 feet
Type Discharge	Pumped	Submerged, uncontrolled

*Design flow not related to Standard Project Flood

DESCRIPTION OF STRUCTURE

Type Three pumping units and one gated spillway in reinforced concrete and concrete block structure

Spillway

Weir Crest

Net Length 16.0 feet

Elevation -8.0 feet

Service Bridge Elevation 8.0 feet

Water Level which will by-pass structure 8.0 feet

Gates

Number 1

Size 11.3 ft. high by 17.3 ft. wide

Type vertical lift

Bottom elevation of gates, full open 3.0 ft. Normal

9.0 ft. Maximum

Top elevation of gates, full closed 3.5 feet

CONTROL On-site, Automatic and remote by telemetry

Lifting Mechanism

Type Hoist Converted from direct drive electric motor gear connected to stem lifts to cable lifts December 2001.

Date of Transfer: November 1, 1954

ACCESS: Highway 441 to Orange Drive, west of 441 on south bank, in Davie

Pumping station

Number of Pumps 3

Size & Type of Pumps 60" vertical lift propeller type

Design rating 180 c.f.s. each

Propeller speed 191 r.p.m.

Pump Manufacturer Fairbanks Morse

Engine Make and Type General Motors, 6-cylinder in-line diesel

Engine Horsepower 275 each

Engine Speed 1625* r.p.m.

Gates (per bay)

Number 1

Location upstream

Type vertical lift

Size 16 feet wide by 11 feet high (clear opening)

Control manual

Lifting Mechanism direct drive electric motor gear connected to cable lifts

HYDRAULIC AND HYDROLOGIC MEASUREMENTS

Water Level On-site, upstream and downstream remote digital recorder.

Gate Position Recorder On-site - remote recorder

Rain Gauge remote digital recorder

Engine Tachometer: On-site remote digital recorder

Electric Power Source

Normal commercial electricity

Emergency diesel engine driven electric generator

SPILLWAY DEWATERING FACILITIES

Upstream and Downstream

Storage West Palm Beach Field Station

Type aluminum needles

Size and Number (per bay)

4 @ 4' wide

PUMP DEWATERING FACILITIES - None

*Engine speed was increased from 1200 to 1625 rpm with change in gear ratio to maintain design pump rpm when engines were replaced 10/94 - 2/95.

1.0 Introduction

Cherokee Enterprises, Inc. (CEI) has prepared this Diesel Fuel Lines Closure Report (DFLCR) to document the activities performed during removal of the former aboveground and former underground diesel fuel lines at the South Florida Water Management District's Pump Station S-13, addressed as 4650 Orange Drive, Davie, Broward County, Florida (Site). The Site is located on the southwest corner of State Road 7 and SW 45th Street (Orange Drive), Davie, Florida. **Figure 1** identifies the location of the Site. The Broward County Pollution Prevention Division (BCPPD) acting on behalf on the Florida Department of Environmental Protection (FDEP) documented the removal of the diesel fuel lines from the Site; and has issued Facility Identification No.: 8622542 to track the Site. A copy of the FDEP's Storage Tank Facility Closure Site Inspection Report is included in **Appendix A**.

The Site currently maintains one 10,000-gallon diesel fuel aboveground storage tank (AST) located within a secondary containment structure. The AST provides off-road diesel fuel for the pump station's stationary compression ignition engines that power water pumps for flood control via new aboveground, steel constructed double-walled pipe. The new aboveground diesel fuel piping was installed prior to CEI's removal of the diesel fuel lines referenced in this report.

2.0 Diesel Fuel Lines Removal Activities

On February 12, 2015, the BCPPD issued a Certificate of Approval to Modify Storage Tank License associated with the removal of the former diesel fuel 8-inch steel containment piping from the Site. A copy of the Certificate of Approval to Modify Storage Tank License letter is included in **Appendix A**.

On May 13, 2016, Down Under Tank Testing conducted a pressure test on the former diesel fuel supply and return lines prior to removal. According to Down Under Tank Testing's report, all of the lines passed the test.

Prior to removal of the diesel fuel lines, on May 17, 2016, World Petroleum Corporation removed the residual diesel fuel from the lines. A total of 115-gallons of diesel fuel was recovered from the lines. A copy of World Petroleum's Non-Hazardous Waste Manifest for the recovered diesel fuel is included in **Appendix B**.

On May 18, 2016, CEI began removing the 1-1/4-inch, steel constructed, diesel fuel supply and two return lines, which were contained within an 8-inch steel constructed pipe (Lines). The Lines connected the 10,000-gallon AST with the pump station's stationary compression ignition engines that power water pumps for flood control. The Lines were aboveground leaving the AST on the north side of the secondary containment structure; then turned down and entered the ground heading west. CEI excavated and removed approximately 11 feet of underground Lines (heading west), until we encountered an electrical conduit above the Lines. CEI cut, filled and capped approximately eight feet of the Lines; and left the Lines in-place, due to conflict with the electrical conduit. The electrical conduit was located directly above the underground Lines. Then CEI resumed excavation and removal of the Lines. CEI continued the Lines removal activities for an additional 10 feet to the west. Then the underground Lines turned 90 degrees to the north, towards the pump station. CEI excavated and removed approximately 27 feet of underground Lines. Then the Lines surfaced where they ran aboveground along the south side of the building to the east side, then entered the building on the eastern side and connected with the compression ignition engines that power water pumps for flood control. All of the aboveground Lines were removed from the Site. **Figures 2 and 3** illustrate the former diesel fuel Line and new diesel fuel lines associated with the Site. Upon completion of the Lines removal from the Site, the area was

backfilled to grade.

The Lines removal were conducted in accordance with the FDEP's Paragraph 62-761.800(3) Florida Administrative Code (F.A.C.) and/or Paragraph 62-762.801(3)(b), F.A.C. Photographic documentation of the Lines removal is included in **Appendix C**.

On May 25, 2016, the removed Lines were transported from the Site by Southern Waste Systems LLC (SWS) and were recycled at Sun Recycling, Inc., an SWS Company. A copy of SWS's disposal/recycling ticket is included in **Appendix D.**

3.0 Closure Assessment

A storage tank system may be exempt from Closure Assessment requirements pursuant to Rule 62-762.801(4)(b)(2), F.A.C. if the tank system was initially installed with secondary containment, provided that no unexplained positive response of an interstitial release detection device or method occurred during the operational life of the system, or the secondary containment passed a breach of integrity test prior to closure.

Based on the information provided by the SFWMD and onsite observation made during the removal of the former Lines, no closure assessment was conducted. The AST system has always been maintained with secondary containment, the former Lines passed a pressure test prior to removal, and there has been no reported diesel fuel releases at the Site. Furthermore, no petroleum odors or soil staining was detected during the removal of the Lines. A copy of the SFWMD's Storage Tank System Closure Assessment Exemption Statement letter is included in **Appendix E**.

4.0 Summary of Findings

The scope of work for this project was to properly remove the former aboveground and underground diesel fuel lines, associated with the 10,000-gallon diesel fuel AST, located at the South Florida Water Management Districts Pump Station S-13, addressed as 4650 Orange Drive, Davie in Broward County, Florida. On May 13, 2016, Down Under Tank Testing conducted a pressure test on the Lines prior to removal. According to Down Under Tank Testing's report, all of the Lines passed the test.

Prior to removal of the former diesel fuel lines, on May 17, 2016, World Petroleum Corporation removed the residual diesel fuel from the lines. A total of 115-gallons of diesel fuel was recovered from the Lines.

On May 18, 2016, CEI began removing the 1-1/4-inch, steel constructed, diesel fuel supply and two return lines, which were contained within an 8-inch steel constructed pipe (Lines). The former Lines connected the 10,000-gallon diesel fuel AST with the pump station's compression ignition engines that power water pumps for flood control. All of the former diesel fuel Lines were removed from the Site, with the exception of approximately eight feet of underground Lines that were left in-place. The Lines were left in-place due to conflict with the electrical conduit located above the Lines. CEI cut, filled and capped the approximately eight feet of the Lines left it in-place. The removed Lines were transported from the Site for proper disposal/recycling.

No closure assessment was required because the diesel fuel Lines were maintained within a secondary containment, passed the pressure test prior to removal and there has been no reported diesel fuel releases at the Site. Photographic documentation of the Lines removal is included in **Appendix C**.

05/19/2016

1) Removing existing UG, DW, steel piping from the AG, 10,000 gallon diesel tank to the pump station (this was replaced with all new AG, DW, steel pipe already installed.)
2) Cherokee is the contractor on site. PCC # 056813.
3) Primary and return line piping is 1-1/4". Outer steel pipe was 8". All the piping I saw that was removed looked in very good condition with no signs of any leakage.
4) Piping trench area was open and saw no evidence of any contamination and no odors observed. Contractor left about 6' of inner and outer pipe in trench due to electrical conduit above it, and filled it with sand and the ends concreted to seal it.
5) Down Under Tank Testing had done a pressure test on the primary and return lines before removal and all passed. Did not do pressure test on outer wall though.
6) Ova samples to be taken tomorrow and a TCAR will be submitted.

In accordance with Paragraph 62-761.800(3) F.A.C. (underground tanks) and/or Paragraph 62-762.801(4) F.A.C. (aboveground tanks) a Storage Tank System Closure Assessment is required to be submitted to the Department within 60 days of a storage tank system closure, replacement, installation of
secondary containment, or change in service from a regulated substance to a non-regulated substance unless the Storage Tank System Closure Assessment is exempt under Paragraph 62-761.800(3)(b),F.A.C.
(underground tanks) and/or Paragraph 62-762.801(4)(b),F.A.C. (aboveground tanks). An explanation of whether or not a closure is required can be found at:
http://www.dep.state.fl.us/waste/quick_topics/publications/pss/tanks/ClosureAssessment.pdf

CERTIFICATE OF APPROVAL TO MODIFY STORAGE TANK LICENSE:
APPROVED RE: CHAPTER 27 - ARTICLE X STORAGE TANKS
ADDENDUM TO LICENSE: HS-02279-14
SFWMD - Pump Station S-13 @ 4650 ORANGE DR, Davie 33314

Dear Mike Gallagher:

This License Modification Approval is issued under the provision of Chapter 27 of the Broward County Code of Ordinances and made part of the current Storage Tank License. The granting of this approval is a final agency determination. A person with a substantial interest may file a petition to request review of or to intervene in a review of a final administrative determination, subject to the provision of Section 27-14, Broward County Code of Ordinances. Pursuant to Chapter 489 F.S., the work performed on underground pollutant storage tank systems in accordance with this license modification as shown on the approved drawings, plans documents, specification herein, as applicable shall be completed by a Certified Pollutant Storage System Specialty Contractor (PSSSC).

Tank Modification Permit #: HS-02279-14-02

Remove the existing 8" steel containment fuel piping and properly remove and dispose of all hazardous and discarded material as per cod

The Pollution Prevention Division (PPD) is informing you that pursuant to Chapter 27-317(d), Broward County Code, a Storage Tank System Closure Assessment Report or a Limited Closure Summary Report must be submitted within sixty (60) days after system removal or closure is completed as required.

You or your authorized agent are required to notify the PPD for the purpose of scheduling an inspection, by calling (954) 519-1229 at least forty-eight (48) hours prior to activity commencement.

If contaminated soil is encountered during the construction activities, such soil shall be properly handled and disposed of in accordance with Chapter 27 of the Broward county Natural Resources Protection Code. If any monitoring wells are disturbed, damaged, or destroyed during the construction activities, they shall be repaired or replaced at the applicant's expense.

If there are any questions or if we can provide assistance, please contact me at (areid@broward.org) at (954) 519-1432, Monday through Friday from 8:30am to 4:30pm.

Sincerely,

Alfred Reid, Engineer III
Pollution Prevention Section Pollution Prevention Division

South Florida Water Management District's Storage Tank System Closure Assessment Exemption Statement Letter

Engineers & Contractors

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

Storage Tank System Closure Assessment Exemption Statement

Facility: South Florida Water Management District – Pump Station S-13
Facility Address: 4650 Orange Drive, Davie, FL 33314
DEP Facility ID: 8622542

A storage tank system may be exempt from Closure Assessment requirements pursuant to Rule 62-762.801(4)(b)(2), F.A.C. if the tank system was initially installed with secondary containment, provided that no unexplained positive response of an interstitial release detection device or method occurred during the operational life of the system, or the secondary containment passed a breach of integrity test prior to closure. The following information is provided in order to assist the regulatory authority with making an exemption determination.

1. Which tank(s) will be closed? Please list size (in gallons) and content.

The tank system at the cited facility consisted of one 10,000 gallon shop-fabricated double walled steel aboveground tank containing off-road diesel fuel. The tank and associated underground piping was initially installed with secondary containment. The tank services stationary compression ignition engines which power water pumps for flood control. The tank was installed in 1994. The tank has not been relocated since its installation.

2. During the operational life of the storage tank system(s) was there any unexplained positive response of an interstitial release detection device or method?

The tank system has always been monitored with a continuous electronic interstitial release detection system. The interstitial space of the tank and underground piping are continuously monitored with leak sensors. Pursuant to Rule 62-762.701(1)(c)(3), F.A.C., an annual operability inspection has been performed on the continuous leak detection system. There were no known releases during operation of the tank system. The tank system has been inspected by a regulatory agency numerous times since its installation and no signs of staining or integrity issues were noted. There have been no unexplained positive response of the interstitial release detection device or method.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AECOM were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 2626-4C50-B4E1

PO # 60741079

Project Broward Spillway Assessment

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 2626-4C50-B4E1

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

AECOM (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

EDR Historical Topo Map Report

03/17/25

Site Name:

S-13 Pump Station
4641 S State Rd 7
Fort Lauderdale, FL 33314
EDR Inquiry # 7928467.4

Client Name:

AECOM
7650 Corporate Center Drive
Miami, FL 33126
Contact: Kelsey Esteves

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AECOM were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 60741079

Project: Broward Spillway Assessment

Coordinates:

Latitude:	26.066087 26° 3' 58" North
Longitude:	-80.209481 -80° 12' 34" West
UTM Zone:	Zone 17 North
UTM X Meters:	579070.53
UTM Y Meters:	2883242.29
Elevation:	4.00' above sea level

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

ACTAVIS LABORATORIES EPA ID:: FLR000071787	***4955 ORANGE DRIVE***	***WNW 1/8 - 1/4 (0.127 mi.)***	***J85***	***180***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 12 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

FL SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the FL SWF/LF list, as provided by EDR, has revealed that there are 9 FL SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

FL LAST: The file for Leaking Aboveground Storage Tanks. Please remember STCM does not track the source of the discharge so the agency provides a list of facilities with an aboveground tank and an open discharge split by facilities with aboveground tanks only and facilities with aboveground and underground tanks.

A review of the FL LAST list, as provided by EDR, and dated 10/21/2024 has revealed that there are 3 FL LAST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

FL UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the FL UST list, as provided by EDR, has revealed that there are 13 FL UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

FL ENG CONTROLS: The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass avariety of engineered remedies to contain and/or reduce , contamination , and/or physical barriers intended to limit access to property ECs include fences, signs, guards, landfill caps, provision of potable water , slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

A review of the FL ENG CONTROLS list, as provided by EDR, and dated 09/12/2024 has revealed that there are 2 FL ENG CONTROLS sites within approximately 0.5 miles of the target property.

FL Fl Sites: This summary status report is a compilation and revision of other existing lists. It was developed from a number of lists including the Eckhardt list, the Moffit list, the EPA Hazardous Waste Sites list, EPA's Emergency and Remedial Response Information System list (RCRA Section 3012), and existing department lists such as the Obsolete Uncontrolled Hazardous Waste Sites list. The purpose of this list is to track the progress of activities within and outside the department as they relate to the listed sites. It is not a list of uncontrolled sites or sources causing environmental contamination. The Sites List comes from the Department of Environmental Protection.

A review of the FL Fl Sites list, as provided by EDR, and dated 12/31/1989 has revealed that there is 1 FL Fl Sites site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that

there are 10 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 11 UST FINDER sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 7 E MANIFEST sites within approximately 0.25 miles of the target property.

FL HAZ WASTE: The records in this data set are generated by county SQG Assessment, Notification and Verification Programs on-site surveys (see 403.7225 FS). The waste records are wastes observed during county inspections. Even though this state program targets SQGs and VSQGs for outreach, some counties choose to additionally look at their LQGs.

A review of the FL HAZ WASTE list, as provided by EDR, and dated 11/11/2024 has revealed that there

are 39 FL HAZ WASTE sites within approximately 0.25 miles of the target property.

FL HW GEN: Small Quantity Hazardous Waste Generators are regulated under the federal Resource Conservation and Recovery Act (RCRA) and applicable state regulations as generators of hazardous wastes in quantities greater than 100 Kg but less than 1,000 Kg in any one calendar month. Large Quantity Generators of Hazardous Waste are tracked in this coverage based on their notification to the Department of Environmental Protection as to their handler status, or based on inspections conducted at their facilities. These facilities are regulated under the federal Resource Conservation and Recovery Act (RCRA) and applicable state regulations as generators of hazardous wastes in quantities equal to or greater than 1,000 Kg in any one calendar month.

A review of the FL HW GEN list, as provided by EDR, and dated 11/14/2024 has revealed that there are 3 FL HW GEN sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BEST CHOICE AUTO	4701 SW 45TH ST BLDG	NW 0 - 1/8 (0.008 mi.)	A15	34

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

ACTAVIS LABORATORIES FL INC (Continued) **1005441805**

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D022
Waste Description: Chloroform

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl

ACTAVIS LABORATORIES FL INC (Continued) **1005441805**

Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Waste Code: U009
Waste Description: 2-Propenenitrile (Or) Acrylonitrile

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U045
Waste Description: Methane, Chloro- (I,T) (Or) Methyl Chloride (I,T)

Waste Code: U055
Waste Description: Benzene, (1-Methylethyl)- (I) (Or) Cumene (I)

Waste Code: U056
Waste Description: Benzene, Hexahydro- (I) (Or) Cyclohexane (I)

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U077
Waste Description: Ethane, 1,2-Dichloro- (Or) Ethylene Dichloride

ACTAVIS LABORATORIES FL INC (Continued) **1005441805**

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U113
Waste Description: 2-Propenoic Acid, Ethyl Ester (I) (Or) Ethyl Acrylate (I)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U125
Waste Description: 2-Furancarboxaldehyde (I) (Or) Furfural (I)

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U188
Waste Description: Phenol

Waste Code: U196
Waste Description: Pyridine

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

ACTAVIS LABORATORIES FL INC (Continued) **1005441805**

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U404
Waste Description: U404

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002

WHEELABRATOR SOUTH (Continued) **1014389055**

Waste Description: Corrosive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D016
Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D020
Waste Description: Chlordane

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of

WHEELABRATOR SOUTH (Continued) **1014389055**

One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U278
Waste Description: Bendiocarb (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-, Methyl Carbamate

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
