Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description:	Barium
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D012
Waste Description:	Endrin (1,2,3,4,10,10-Hexachloro-1,7-Epoxy-1,4,4a,5,6,7,8,8a-Octahydro-1,4-En do, Endo-5,8-Dimeth-Ano-Naphthalene)
Waste Code:	D013
Waste Description:	Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)
Waste Code:	D014
Waste Description:	Methoxychlor (1,1,1-Trichloro-2,2-Bis [P-Methoxyphenyl] Ethane)
Waste Code:	D015
Waste Description:	Toxaphene (C10 H10 Cl8, Technical Chlorinated Camphene, 67-69 Percent Chlorine)
Waste Code:	D016
Waste Description:	2,4-D (2,4-Dichlorophenoxyacetic Acid)
Waste Code:	D017
Waste Description:	2,4,5-Tp Silvex (2,4,5-Trichlorophenoxypropionic Acid)
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D019
Waste Description:	Carbon Tetrachloride
Waste Code:	D020
Waste Description:	Chlordane
Waste Code:	D021
Waste Description:	Chlorobenzene
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D023

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D030
Waste Description: 2,4-Dinitrotoluene

Waste Code: D031
Waste Description: Heptachlor (And Its Epoxide)

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D037
Waste Description: Pentachlorophenol

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D041
Waste Description: 2,4,5-Trichlorophenol

Waste Code: D042

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	F007
Waste Description:	Spent Cyanide Plating Bath Solutions From Electroplating Operations.
Waste Code:	F008
Waste Description:	Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.
Waste Code:	F009
Waste Description:	Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.
Waste Code:	F010
Waste Description:	Quenching Bath Residues From Oil Baths From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.
Waste Code:	F011
Waste Description:	Spent Cyanide Solutions From Slat Bath Pot Cleaning From Metal Heat Treating Operations.
Waste Code:	F012
Waste Description:	Quenching Wastewater Treatment Sludges From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.
Waste Code:	F019
Waste Description:	Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.
Waste Code:	F020
Waste Description:	Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- Or Tetrachlorophenol Or Of Intermediates Used To Produce Their Pesticide Derivatives. (This Listing Does Not Include Wastes From The Production Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)
Waste Code:	F021
Waste Description:	Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Pentachlorophenol, Or Of Intermediates Used To Produce Derivatives.
Waste Code:	F022
Waste Description:	Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzenes Under Alkaline Conditions.

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code: F023
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- And Tetrachlorophenols. (This Listing Does Not Include Wastes From Equipment Used Only For The Production Or Use Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Waste Code: F024
Waste Description: Process Wastes Including, But Not Limited To, Distillation Residues, Heavy Ends, Tars, And Reactor Clean-Out Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution. (This Listing Does Not Include Wastewaters, Wastewater Treatment Sludge, Spent Catalysts, And Wastes Listed In Sections 261.31. Or 261.32)

Waste Code: F025
Waste Description: Condensed Light Ends, Spent Filters And Filter Aids, And Spent Desiccant Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution.

Waste Code: F026
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzene Under Alkaline Conditions.

Waste Code: F027
Waste Description: Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)

Waste Code: F028
Waste Description: Residues Resulting From The Incineration Or Thermal Treatment Of Soil Contaminated With Epa Hazardous Waste Nos. F020, F021, F022, F023, F026, And F027.

Waste Code: F032
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Currently Use, Or Have Previously Used, Chlorophenolic Formulations [Except Potentially Cross-Contaminated Wastes That Have Had The F032 Waste Code Deleted In Accordance With Section 261.35 (I.E., The Newly Promulgated Equipment Cleaning Or Replacement Standards), And Where The Generator Does Not Resume Or Initiate Use Of Chlorophenolic Formulations]. (This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.)

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code: F034
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Creosote Formulations. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F035
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Inorganic Preservatives Containing Arsenic Or Chromium. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Waste Code: F038
Waste Description: Petroleum Refinery Secondary (Emulsified) Oil/Water/Solids Separation Sludge - Any Sludge And/Or Float Generated From The Physical And/Or Chemical Separation Of Oil/Water/Solids In Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Wastes Include, But Are Not Limited To, All Sludges And Floats Generated In Induced Air Flotation (Iaf) Units, Tanks And Impoundments, And All Sludges Generated In Daf Units. Sludges Generated In Stormwater Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And F037, K048, And K051 Wastes Are Exempted From This Listing.

Waste Code: F039
Waste Description: Leachate Resulting From The Treatment, Storage, Or Disposal Of Wastes Classified By More Than One Waste Code Under Subpart D, Or From A Mixture Of Wastes Classified Under Subparts C And D Of This Part. (Leachate Resulting From The Management Of One Or More Of The Following Epa Hazardous Wastes And No Other Hazardous Wastes Retains Its Hazardous Waste Code(S): F020, F021, F022, F023, F026, F027, And/Or F028.)

Waste Code: K001
Waste Description: Bottom Sediment Sludge From The Treatment Of Wastewaters From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code:	K002
Waste Description:	Wastewater Treatment Sludge From The Production Of Chrome Yellow And Orange Pigments.
Waste Code:	K003
Waste Description:	Wastewater Treatment Sludge From The Production Of Molybdate Orange Pigments.
Waste Code:	K004
Waste Description:	Wastewater Treatment Sludge From The Production Of Zinc Yellow Pigments.
Waste Code:	K005
Waste Description:	Wastewater Treatment Sludge From The Production Of Chrome Green Pigments.
Waste Code:	K006
Waste Description:	Wastewater Treatment Sludge From The Production Of Chrome Oxide Green Pigments (Anhydrous And Hydrated).
Waste Code:	K007
Waste Description:	Wastewater Treatment Sludge From The Production Of Iron Blue Pigments.
Waste Code:	K008
Waste Description:	Oven Residue From The Production Of Chrome Oxide Green Pigments.
Waste Code:	K009
Waste Description:	Distillation Bottoms From The Production Of Acetaldehyde From Ethylene.
Waste Code:	K010
Waste Description:	Distillation Side Cuts From The Production Of Acetaldehyde From Ethylene.
Waste Code:	K011
Waste Description:	Bottom Stream From The Wastewater Stripper In The Production Of Acrylonitrile.
Waste Code:	K013
Waste Description:	Bottom Stream From The Acetonitrile Column In The Production Of Acrylonitrile.
Waste Code:	K014
Waste Description:	Bottoms From The Acetonitrile Purification Column In The Production Of Acrylonitrile.
Waste Code:	K015
Waste Description:	Still Bottoms From The Distillation Of Benzyl Chloride.
Waste Code:	K016
Waste Description:	Heavy Ends Or Distillation Residues From The Production Of Carbon Tetrachloride.
Waste Code:	K017
Waste Description:	Heavy Ends (Still Bottoms) From The Purification Column In The Production Of Epichlorohydrin.

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code:	K018
Waste Description:	Heavy Ends From The Fractionation Column In Ethyl Chloride Production.
Waste Code:	K019
Waste Description:	Heavy Ends From The Distillation Of Ethylene Dichloride In Ethylene Dichloride Production.
Waste Code:	K020
Waste Description:	Heavy Ends From The Distillation Of Vinyl Chloride In Vinyl Chloride Monomer Production.
Waste Code:	K021
Waste Description:	Aqueous Spent Antimony Catalyst Waste From Fluoromethane Production.
Waste Code:	K022
Waste Description:	Distillation Bottom Tars From The Production Of Phenol/Acetone From Cumene.
Waste Code:	K023
Waste Description:	Distillation Light Ends From The Production Of Phthalic Anhydride From Naphthalene.
Waste Code:	K024
Waste Description:	Distillation Bottoms From The Production Of Phthalic Anhydride From Naphthalene.
Waste Code:	K025
Waste Description:	Distillation Bottoms From The Production Of Nitrobenzene By The Nitration Of Benzene.
Waste Code:	K026
Waste Description:	Stripping Still Tails From The Production Of Methyl Ethyl Pyridines.
Waste Code:	K027
Waste Description:	Centrifuge And Distillation Residues From Toluene Diisocyanate Production.
Waste Code:	K028
Waste Description:	Spent Catalyst From The Hydrochlorinator Reactor In The Production Of 1,1,1-Trichloroethane.
Waste Code:	K029
Waste Description:	Waste From The Product Steam Stripper In The Production Of 1,1,1-Trichloroethane.
Waste Code:	K030
Waste Description:	Column Bottoms Or Heavy Ends From The Combined Production Of Trichloroethylene And Perchloroethylene.
Waste Code:	K031
Waste Description:	By-Product Salts Generated In The Production Of Msma And Cacodylic Acid.
Waste Code:	K034
Waste Description:	Filter Solids From The Filtration Of Hexachlorocyclopentadiene In The Production Of Chlordane.

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code:	K035
Waste Description:	Wastewater Treatment Sludges Generated In The Production Of Creosote.
Waste Code:	K036
Waste Description:	Still Bottoms From Toluene Reclamation Distillation In The Production Of Disulfoton.
Waste Code:	K037
Waste Description:	Wastewater Treatment Sludges From The Production Of Disulfoton.
Waste Code:	K038
Waste Description:	Wastewater From The Washing And Stripping Of Phorate Production.
Waste Code:	K039
Waste Description:	Filter Cake From The Filtration Of Diethylphosphorodithioic Acid In The Production Of Phorate.
Waste Code:	K040
Waste Description:	Wastewater Treatment Sludge From The Production Of Phorate.
Waste Code:	K041
Waste Description:	Wastewater Treatment Sludge From The Production Of Toxaphene.
Waste Code:	K042
Waste Description:	Heavy Ends Or Distillation Residues From The Distillation Of Tetrachlorobenzene In The Production Of 2,4,5-T.
Waste Code:	K043
Waste Description:	2,6-Dichlorophenol Waste From The Production Of 2,4-D.
Waste Code:	K048
Waste Description:	Dissolved Air Flotation (Daf) Float From The Petroleum Refining Industry.
Waste Code:	K049
Waste Description:	Slop Oil Emulsion Solids From The Petroleum Refining Industry.
Waste Code:	K050
Waste Description:	Heat Exchanger Bundle Cleaning Sludge From The Petroleum Refining Industry.
Waste Code:	K051
Waste Description:	Api Separator Sludge From The Petroleum Refining Industry.
Waste Code:	K052
Waste Description:	Tank Bottoms (Leaded) From The Petroleum Refining Industry.
Waste Code:	K060
Waste Description:	Ammonia Still Lime Sludge From Coking Operations.
Waste Code:	K061
Waste Description:	Emission Control Dust/Sludge From The Primary Production Of Steel In Electric Furnaces.
Waste Code:	K062
Waste Description:	Spent Pickle Liquor From Steel Finishing Operations Of Plants That Produce Iron Or Steel.

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code: K064
Waste Description: Acid Plant Blowdown Slurry/Sludge Resulting From The Thickening Of Blowdown Slurry From Primary Copper Production.

Waste Code: K065
Waste Description: Surface Impoundment Solids Contained In And Dredged From Surface Impoundments At Primary Lead Smelting Facilities.

Waste Code: K066
Waste Description: Sludge From Treatment Of Process Wastewater And/Or Acid Plant Blowdown From Primary Zinc Production.

Waste Code: K069
Waste Description: Emission Control Dust/Sludge From Secondary Lead Smelting.

Waste Code: K071
Waste Description: Brine Purification Muds From The Mercury Cell Process In Chlorine Production, In Which Separately Prepurified Brine Is Not Used.

Waste Code: K073
Waste Description: Chlorinated Hydrocarbon Waste From The Purification Step Of The Diaphragm Cell Process Using Graphite Anodes In Chlorine Production.

Waste Code: K083
Waste Description: Distillation Bottoms From Aniline Production.

Waste Code: K084
Waste Description: Wastewater Treatment Sludges Generated During The Production Of Veterinary Pharmaceuticals From Arsenic Or Organo-Arsenic Compounds.

Waste Code: K085
Waste Description: Distillation Or Fractionation Column Bottoms From The Production Of Chlorobenzenes.

Waste Code: K086
Waste Description: Solvent Washes And Sludges, Caustic Washes And Sludges, Or Water Washes And Sludges From Cleaning Tubs And Equipment Used In The Formulation Of Ink From Pigments, Driers, Soaps, And Stabilizers Containing Chromium And Lead.

Waste Code: K087
Waste Description: Decanter Tank Tar Sludge From Coking Operations.

Waste Code: K088
Waste Description: Spent Potliners From Primary Aluminum Reduction.

Waste Code: K090
Waste Description: Emission Control Dust Or Sludge From Ferrochromiumsilicon Production.

Waste Code: K091
Waste Description: Emission Control Dust Or Sludge From Ferrochromium Production.

Waste Code: K093
Waste Description: Distillation Light Ends From The Production Of Phthalic Anhydride From Ortho-Xylene.

Waste Code: K094

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description:	Distillation Bottoms From The Production Of Phthalic Anhydride From Ortho-Xylene.
Waste Code:	K095
Waste Description:	Distillation Bottoms From The Production Of 1,1,1-Trichloroethane.
Waste Code:	K096
Waste Description:	Heavy Ends From The Heavy Ends Column From The Production Of 1,1,1-Trichloroethane.
Waste Code:	K097
Waste Description:	Vacuum Stripper Discharge From The Chlordane Chlorinator In The Production Of Chlordane.
Waste Code:	K098
Waste Description:	Untreated Process Wastewater From The Production Of Toxaphene.
Waste Code:	K099
Waste Description:	Untreated Wastewater From The Production Of 2,4-D.
Waste Code:	K100
Waste Description:	Waste Leaching Solution From Acid Leaching Of Emission Control Dust/Sludge From Secondary Lead Smelting.
Waste Code:	K101
Waste Description:	Distillation Tar Residues From The Distillation Of Aniline-Based Compounds In The Production Of Veterinary Pharmaceuticals From Arsenic Or Organo-Arsenic Compounds.
Waste Code:	K102
Waste Description:	Residue From The Use Of Activated Carbon For Decolorization In The Production Of Veterinary Pharmaceuticals From Arsenic Or Organo-Arsenic Compounds.
Waste Code:	K103
Waste Description:	Process Residues From Aniline Extraction From The Production Of Aniline.
Waste Code:	K104
Waste Description:	Combined Wastewaters Generated From Nitrobenzene/Aniline Production.
Waste Code:	K105
Waste Description:	Separated Aqueous Stream From The Reactor Product Washing Step In The Production Of Chlorobenzenes.
Waste Code:	K106
Waste Description:	Wastewater Treatment Sludge From The Mercury Cell Process In Chlorine Production.
Waste Code:	K107
Waste Description:	Column Bottoms From Product Separation From The Production Of 1,1-Dimethylhydrazine (Udmh) From Carboxylic Acid Hydrazides.
Waste Code:	K108
Waste Description:	Condensed Column Overheads From Product Separation And Condensed Reactor Vent Gases From The Production Of 1,1-Dimethylhydrazine From Carboxylic Acid Hydrazides.

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code: K109
Waste Description: Spent Filter Cartridges From Product Purification From The Product Of 1,1-Dimethylhydrazine From Carboxylic Acid Hydrazides.

Waste Code: K110
Waste Description: Condensed Column Overheads From Intermediate Separation From The Production Of 1,1-Dimethylhydrazine From Carboxylic Acid Hydrazides.

Waste Code: K111
Waste Description: Product Washwaters From The Production Of Dinitrotoluene Via Nitration Of Toluene.

Waste Code: K112
Waste Description: Reaction By-Product Water From The Drying Column In The Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K113
Waste Description: Condensed Liquid Light Ends From Purification Of Toluenediamine In Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K114
Waste Description: Vicinals From The Purification Of Toluenediamine In Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K115
Waste Description: Heavy Ends From Purification Of Toluenediamine In The Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K116
Waste Description: Organic Condensate From The Solvent Recovery Column In The Production Of Toluene Diisocyanate Via Phosgenation Of Toluenediamine.

Waste Code: K117
Waste Description: Wastewater From The Reactor Vent Gas Scrubber In The Production Of Ethylene Dibromide Via Bromination Of Ethene.

Waste Code: K118
Waste Description: Spent Adsorbent Solids From Purification Of Ethylene Dibromide In The Production Of Ethylene Dibromide Via Bromination Of Ethene.

Waste Code: K131
Waste Description: Wastewater From The Reactor And Spent Sulfuric Acid From The Acid Dryer From The Production Of Methyl Bromide.

Waste Code: K132
Waste Description: Spent Absorbent And Wastewater Separator Solids From The Production Of Methyl Bromide.

Waste Code: K136
Waste Description: Still Bottoms From The Purification Of Ethylene Dibromide In The Production Of Ethylene Dibromide Via Bromination Of Ethene.

Waste Code: K141
Waste Description: Process Residues From The Recovery Of Coal Tar, Including, But Not Limited To, Tar Collecting Sump Residues From The Production Of Coke From Coal Or The Recovery Of Coke By-Products Produced From Coal. This Listing Does Not Include K087 (Decanter Tank Sludge From Coking

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Operations).

Waste Code: K142
Waste Description: Tank Storage Residues From The Production Of Coke From Coal Or From The Recovery Of Coke By-Products From Coal.

Waste Code: K143
Waste Description: Process Residues From The Recovery Of Light Oil, Including, But Not Limited To, Those Generated In Stills, Decanters, And Wash Oil Recovery Units From The Recovery Of Coke By-Products Produced From Coal.

Waste Code: K144
Waste Description: Wastewater Sump Residues From Light Oil Refining, Including, But Not Limited To, Intercepting Or Contamination Sump Sludges From The Recovery Of Coke By-Products Produced From Coal.

Waste Code: K145
Waste Description: Residues From Naphthalene Collection And Recovery Operations From The Recovery Of Coke By-Products Produced From Coal.

Waste Code: K147
Waste Description: Tar Storage Residues From Coal Tar Refining.

Waste Code: K148
Waste Description: Residues From Coal Tar Distillation, Including, But Not Limited To, Still Bottoms.

Waste Code: K149
Waste Description: Distillation Bottoms From The Production Of Alpha (Or Methyl-) Chlorinated Tolunes, Ring-Chlorinated Tolunes, Benzoyl Chlorides, And Compounds With Mixtures Of These Functional Groups. [This Waste Does Not Include Still Bottoms From The Distillation Of Benzoyl Chloride]

Waste Code: K150
Waste Description: Organic Residules Excluding Spent Carbon Adsorbent, From The Spent Chlorine Gas And Hydrochloric Acid Recovery Processes Associated With The Production Of Alpha (Or Methyl-) Chlorinated Tolunes, Benzoyl Chlorides, And Compounds With Mixtures Of These Functional Groups.

Waste Code: K151
Waste Description: Wastewater Treatment Sludges, Excluding Neutralization And Biological Sludges, Generated During The Treatment Of Wastewaters From The Production Of Alpha (Or Methyl-) Chlorinated Tolunes, Benzoyl Chlorides, And Compounds With Mixtures Of These Functional Groups.

Waste Code: K156
Waste Description: Organic Waste (Including Heavy Ends, Still Bottoms, Light Ends, Spent Solvents, Filtrates, And Decantates) From The Production Of Carbamates And Carbamoyl Oximes.

Waste Code: K157
Waste Description: Wastewaters (Including Scrubber Waters, Condenser Waters, Washwaters, And Separation Waters) From The Production Of Carbamates And Carbamoyl Oximes.

Waste Code: K158

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description:	Bag House Dusts And Filter/Separation Solids From The Production Of Carbamates And Carbamoyl Oximes.
Waste Code:	K159
Waste Description:	Organics From The Treatment Of Thiocarbamate Wastes.
Waste Code:	K161
Waste Description:	Purification Solids (Including Filtration, Evaporation, And Centrifugation Solids), Bag House Dust And Floor Sweepings From The Production Of Dithiocarbamate Acids And Their Salts. (This Listing Does Not Include K125 Or K126).
Waste Code:	K169
Waste Description:	K169

Waste Code:	K174
Waste Description:	Wastewater Treatment Sludges From The Production Of Ethlyene Dichloride Or Vinyl Chloride
Waste Code:	K175
Waste Description:	Wastewater Treatment Sludge From The Production Of Vinyl Chloride Monomer..
Waste Code:	K176
Waste Description:	Baghouse Filters From The Production Of Antimony Oxide, Including Filters From The Production Of Intermediates (E.G.,Antimony Metal Or Crude Antimony Oxide)
Waste Code:	K177
Waste Description:	Slag From The Production Of Antimony Oxide That Is Speculatively Accumulated Or Disposed,Including Slag From The Production Of Intermediates (E.G.,Antimony Metal Or Crude Antimony Oxide)
Waste Code:	K178
Waste Description:	Residues From Manufacturing And Manufacturing-Site Storage Of Ferric Chloride From Acids Formed During The Production Of Titanium Dioxide Using The Chloride-Ilmenite Process.
Waste Code:	P001
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%
Waste Code:	P002
Waste Description:	1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-
Waste Code:	P003
Waste Description:	2-Propenal (Or) Acrolein

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Code:	P004
Waste Description:	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin
Waste Code:	P005
Waste Description:	2-Propen-1-Ol (Or) Allyl Alcohol
Waste Code:	P006
Waste Description:	Aluminum Phosphide (R,T)
Waste Code:	P007
Waste Description:	3(2h)-Isoxazolone, 5-(Aminomethyl)- (Or) 5-(Aminomethyl)-3-Isoxazolol
Waste Code:	P008
Waste Description:	4-Aminopyridine (Or) 4-Pyridinamine
Waste Code:	P009
Waste Description:	Ammonium Picrate (R) (Or) Phenol, 2,4,6-Trinitro-, Ammonium Salt (R)
Waste Code:	P010
Waste Description:	Arsenic Acid H3aso4
Waste Code:	P011
Waste Description:	Arsenic Oxide As2o5 (Or) Arsenic Pentoxide
Waste Code:	P012
Waste Description:	Arsenic Oxide As2o3 (Or) Arsenic Trioxide
Waste Code:	P013
Waste Description:	Barium Cyanide
Waste Code:	P014
Waste Description:	Benzenethiol (Or) Thiophenol
Waste Code:	P015
Waste Description:	Beryllium
Waste Code:	P016
Waste Description:	Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-
Waste Code:	P017
Waste Description:	2-Propanone, 1-Bromo- (Or) Bromoacetone
Waste Code:	P018
Waste Description:	Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-
Waste Code:	P020
Waste Description:	Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-
Waste Code:	P021
Waste Description:	Calcium Cyanide (Or) Calcium Cyanide Ca(Cn)2
Waste Code:	P022
Waste Description:	Carbon Disulfide
Waste Code:	P023

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description: Acetaldehyde, Chloro- (Or) Chloroacetaldehyde

Waste Code: P024
Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P026
Waste Description: 1-(O-Chlorophenyl)Thiourea (Or) Thiourea, (2-Chlorophenyl)-

Waste Code: P027
Waste Description: 3-Chloropropionitrile (Or) Propanenitrile, 3-Chloro-

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P031
Waste Description: Cyanogen (Or) Ethanedinitrile

Waste Code: P033
Waste Description: Cyanogen Chloride (Or) Cyanogen Chloride (Cn)Cl

Waste Code: P034
Waste Description: 2-Cyclohexyl-4,6-Dinitrophenol (Or) Phenol, 2-Cyclohexyl-4,6-Dinitro-

Waste Code: P036
Waste Description: Arsonous Dichloride, Phenyl- (Or) Dichlorophenylarsine

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P041
Waste Description: Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043

TRIUMVIRATE ENVIRONMENTAL (FLORIDA) INC. (Continued) **1000202542**

Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

Lists of state and tribal brownfield sites

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/04/2024
Date Data Arrived at EDR: 11/05/2024
Date Made Active in Reports: 01/27/2025

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

UTM Y (Meters):	2883079.2
Elevation:	4 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	17176295 FORT LAUDERDALE SOUTH, FL
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

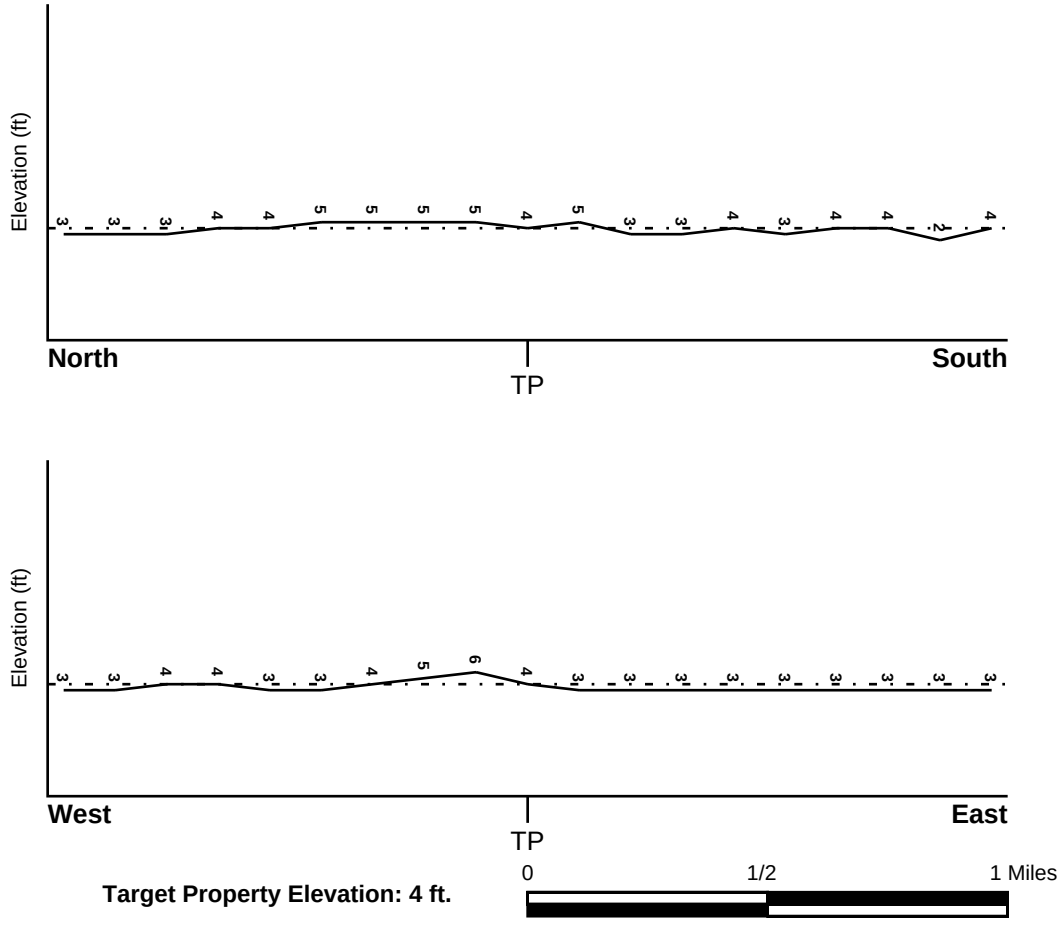
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
12011C0554H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

12011C0561H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FORT LAUDERDALE SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
C6	1/4 - 1/2 Mile NNE	SE
F21	1/2 - 1 Mile ESE	E
46	1/2 - 1 Mile North	SW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
3G	1/4 - 1/2 Mile NNE	SE
4G	1/2 - 1 Mile ESE	E

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 3

Soil Component Name: Lauderhill

Soil Surface Texture: muck

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Very poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 77 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	31 inches	muck	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
2	31 inches	31 inches	bedrock	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

Soil Map ID: 4

Soil Component Name: Margate

Soil Surface Texture: fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 77 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
2	7 inches	16 inches	fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
3	16 inches	27 inches	fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
4	27 inches	31 inches	gravelly fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
5	31 inches	31 inches	bedrock	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

Soil Map ID: 5

Soil Component Name: Arents, organic substratum

Soil Surface Texture: cobbly sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	cobbly sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1
2	11 inches	38 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1
3	38 inches	51 inches	muck	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1
4	51 inches	72 inches	sand	Not reported	Not reported	Max: 141 Min: 42	Max: 7.3 Min: 5.1

Soil Map ID: 6

Soil Component Name: Matlacha

Soil Surface Texture: gravelly sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	gravelly sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
2	22 inches	44 inches	fine sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
3	44 inches	48 inches	fine sandy loam	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
4	48 inches	48 inches	bedrock	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 7

Soil Component Name: Udorthents

Soil Surface Texture: cobbly sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 92 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	29 inches	cobbly sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
2	29 inches	50 inches	sand	Not reported	Not reported	Max: 141 Min: 14	Max: Min:
3	50 inches	50 inches	bedrock	Not reported	Not reported	Max: 141 Min: 14	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Babu Madabhushi, PhD

Years of experience
31 total | 25 with AECOM

Babu has 31 years of experience in conducting and managing environmental engineering projects. His technical expertise is in the areas of conducting contamination assessment, evaluation, water/wastewater treatment, groundwater treatment, remedial system operation and maintenance.

Babu is extremely knowledgeable of FDOT District Four, Florida's Turnpike Enterprise, DERM, FDEP and local regulations and standards. His expertise also encompasses sediment characterization, dredge design, RCRA Facility Investigation, contamination assessment, impact assessment, remedial investigation and feasibility studies, soil and groundwater remediation, in-situ bioremediation, and operation and maintenance of remedial systems.

Professional experience

Contamination Assessment and Remediation Services - BEE68, FDOT District Four (2022 – Present). Managing CAR Contract that included several task orders for projects that require soil and groundwater assessment, dewatering treatment and management, and regulatory agency coordination. The projects are located in Broward, Palm Beach, St. Lucie, and Martin Counties.

Contamination Assessment and Remediation Services - BE678, FDOT District Four (2020 – 2022). Managing CAR Contract that included several task orders for projects that require soil and groundwater assessment, dewatering treatment and management, and regulatory agency coordination. The projects are located in Broward, Palm Beach, St. Lucie, and Martin Counties.

Contamination Evaluation and Screening -PD&E Studies, FDOT District Six, Miami-Dade (SR-826, NW 74th St), Broward (I-95 Express Lanes, SW 10th St, Miami Gardens to County Line), St. Lucie (SR-80), Martin, and Monroe (US-1) Counties, FL (2003 – 2021). Developed CSER for more than 30 project locations and Re-Evaluation Reports for several FDOT projects in Miami-Dade (SR-826, NW 74th St), Broward (I-95 Express Lanes, SW 10th St, I-95), St. Lucie (SR-80), Martin, and Monroe (US-1) counties.

SR-826/Palmetto Expressway from north of NW 25th St to North of NW 104th St CSER, FDOT District Six, Miami-Dade County, FL (2022 – 2024). Contamination lead for the FDOT PLEMO with environmental assessment support services for the SR-826/Palmetto Expressway CSER. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on contamination potential.

SR-826/Palmetto Expressway from South of NW 25th St to North of NW 154th St SEIR, FDOT District Six, Miami-Dade County, FL (2020 – 2021). Contamination Lead to provide the FDOT PLEMO with environmental assessment support services for the SR 826 / Palmetto Expressway SEIR. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on contamination potential**.**

I-95 from South of NW 10th St to North of Hillsboro Boulevard, FDOT District Four, Broward County, FL (2017 – 2021). Contamination Lead for environmental tasks associated with the performance of a PD&E Study. Tasks include Contamination Lead to provide the FDOT PLEMO with environmental assessment support services. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on their contamination potential**.**

Education

PhD, Hazardous Waste Management, West Virginia University, 1997
MS, Wastewater Treatment, Indian Institute of Technology, 1993
BS, Civil Engineering, Kakatiya University, 1988

Expertise

CAR Project Manager
Contamination Assessment
Remedial Design
Remedial Action Implementation
Water/Wastewater Treatment
Groundwater Treatment
Remedial System Operation and Maintenance
Sediment Characterization

Training

40-hr OSHA HAZWOPER
8-hr OSHA HAZWOPER Annual Refresher

Registrations/Certifications

AECOM Certified Project Manager
AECOM Lead Verifier: In Situ Bioremediation

SR-826/Palmetto Expressway from US-1 (SR-5) to SR-836 / Dolphin Expressway, FDOT District Six, Miami-Dade County, FL (2018 – Present). Contamination lead for environmental tasks associated with the performance of an approximate 7-mile PD&E Study**.** Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on their contamination potential.

I-75 from Miami-Dade County Line to SR-826 (Palmetto Expressway) PD&E Study, FDOT District Six, Miami-Dade County, FL (2007 – Present). Contamination lead for the performance of a PD&E Study. Tasks include performance of the Level I contamination assessment, provide recommendations for Level II after ranking the sites based on their contamination potential.

Wagner Creek/Seybold Canal Contaminated Sediment Dredging and Disposal (2017 – Present). Managed this critical project in a heavily commercialized area near Jackson Hospital. This included sediment dredge design, permitting, contaminated sediment characterization/handling, sediment stabilization, turbidity control and disposal at out of state landfill. Won multiple awards (from FDEP and other entities) for successfully completing this under budget and within schedule without harming the manatees.

Former Eaker Air Force Base Remediation, U.S. Air Force, Blytheville, AR (2011 – 2021). Project manager for this performance-based remediation contract to obtain unrestricted closure for four former RCRA sites at the former Eaker AFB. The sites are contaminated with petroleum compounds, light non-aqueous phase liquid, chlorinated solvents, and arsenic. Services include remedial investigation, innovative remediation enhancements, contaminated soil removal, in-situ soil and groundwater remediation, GIS mapping and support, groundwater modeling, and routine regulatory interaction. After successful completion or remedial investigation, the site is currently undergoing active groundwater remediation. He is also responsible for performing EPA's 5-Year Review Process.

Miami Dade DERM-14/E20 Contracts, Miami-Dade Aviation Department, Miami International Airport, Opa Locka Airport, Public Housing, Northwest Cargo Area, Miami, FL (2002 – 2021). Managed several projects that included delineation of petroleum, chlorinated solvent, and metals contamination at these properties. Installed several deep nested wells to delineate contamination in various zones of the aquifer. Multiple wells were installed in the vicinity of the runways, in the public right of way, and in the vicinity of residential areas. Currently overseeing the long-term groundwater monitoring activities.

Former Homestead Air Force Base Remediation, US Air Force, Homestead, FL (2011 – 2021). Deputy project manager for a performance-based remediation contract to obtain unrestricted closure for four former RCRA sites at the former Homestead AFB. The sites are contaminated with petroleum compounds, chlorinated solvents, and arsenic. Services include remedial investigation, preparation of Explanation of Significant Differences (ESD) to Record of Decision (ROD) document, innovative remediation enhancements, contaminated soil removal, in-situ soil and groundwater remediation, storage tank removal, remedial design modifications, GIS mapping and support, groundwater modeling, and routine regulatory interaction. After successful completion or remedial investigation, the site is currently undergoing active groundwater remediation. He is also responsible for performing EPA's 5-Year Review Process.

Contamination Evaluation Studies, FGT, Miami-Dade, Broward, St. Lucie, Martin, Bradford, Hillsborough, Orange, and Monroe Counties, FL, (2006 – Present). Contamination Specialist, responsible for developing contamination evaluation reports and Contingency Plans for numerous project locations in Miami-Dade, Broward, St. Lucie, Martin, Bradford, Hillsborough, Orange, and Monroe counties for projects associated with hydrotesting, pipeline maintenance/repairs and pipeline abandonment work.

Blue Lagoon Post Office Site Assessment, Remediation, and Methane Collection System, US Postal Service, Miami, FL (2003 – Present). Project Manager/Senior Environmental engineer for contamination assessment at a facility constructed over a filled-in canal where lead was found in the soil above state cleanup levels. Work included soil and groundwater remediation activities and methane gas collection system design and monitoring. Currently, AECOM is performing natural attenuation monitoring and methane gas monitoring.

Remediation Engineering, Federal Aviation Administration (FAA), William J. Hughes Technical Center, Atlantic City, NJ (2005 – 2012). Remediation engineering task leader for operation and maintenance of treatment systems for approximately 5,000-acre CERCLA Superfund site at Areas B, D, 20A, 29, and Area 41. Assisted with operation and maintenance of the existing Central Treatment Plant (Pump and Treat System) to treat petroleum contaminated water. Provided innovative remediation enhancements, such as in-situ aerobic bioremediation of petroleum compounds and reductive dechlorination of chlorinated solvents, contaminated soil removal, vapor extraction, groundwater and soil investigations, GIS mapping and support, groundwater modeling, and routine regulatory interaction.

Executive Summary

South Florida Water Management District (SFWMD) contracted with AECOM Technical Services, Inc. (AECOM) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the S33 Gated Spillway Facility that encompasses portions of two separate parcels identified by Broward County Parcel Identification Numbers (PINs) 5042-06-00-0010 and 5042-06-00-0110, Lauderhill, Broward County, Florida (subject property). This Phase I ESA was performed in general conformance with the scope and limitations of ASTM International, Designation: E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). Exceptions to, or deletions from, this practice are described in this report.

The site visits occurred on January 10, 2025 (exterior portions and surrounding area) and January 22, 2025 (interior of the onsite building). The 6.7-acre subject property encompasses approximately 2.2 acres of the North Fork New River (NFN River), a gated spillway structure, S33, and a single-story control building that houses electronical equipment used to operate the water control structure. The gated spillway structure is not manned, and the operations are automatically, or telemetry controlled. The southern portion of the subject property bordering the NFN River is landscaped with grass and a boat ramp was observed on the southwestern portion of the subject property. Utility conduits crossing the NFN River, west of the S33 structure were observed. The eastern and western portions of the subject property are occupied by the NFN River and the northern portion consists of concrete canal embankment. One (1) underground storage tank (UST) containing propane of an unknown capacity was observed next to the control building on the southcentral portion of the subject property during the site reconnaissance. No visual evidence of potable water wells, monitoring wells, clarifiers, dry wells, septic tanks, or leach fields were observed during the site visit.

The subject property is located in a mixed-use area of residential and commercial properties within the city of Lauderhill. The subject property is bordered to the north by Sunrise Boulevard followed by a number of commercial properties including the Swap Shop Flea Market and a Marathan Gas Station. The subject property is bordered to the east by Northwest 34th Avenue followed by the NFN River. The subject property is bordered to the south by single-family residential properties. The subject property is bordered to the west by the NFN River. Dry cleaners were not observed in the immediate vicinity (approximately 500 feet) of the subject property. Other off-site sources of concern were not identified in the immediate vicinity.

AECOM's historical review indicates that the subject property consisted of vacant, wooded land by at least 1940. A river, consistent with present-day NFN River is depicted bisecting the subject property. The subject property remained in this general configuration through at least 1958. By at least 1958, the NFN River has been widened and the present-day gated spillway structure, S33, is depicted within the NFN River, on the eastern portion of the subject property. Additionally, an L-shaped canal is depicted on the southeastern side of the S33 structure and continues south. By at least 1968, the utility conduits crossing the canal, west of S33 are depicted. By at least 1971, the present-day control building, southwest of the gated spillway structure S33 is depicted. The subject property remained in this general configuration through at least 2002 when, the L-shaped canal has been modified with a culvert and backfilled. By at least 2008, improvements to the northern canal embankment are depicted. The subject property remained in its current configuration (as observed during AECOM's site visit) since at least 2008. No recognized environmental conditions (RECs) were identified based on the historical review. No historical on-site or off-site sources of concern were identified during this assessment.

The subject property was identified on the UST database with Florida Department of Environmental Protection (FDEP) Facility ID (No.) 8733118. According to information found on the FDEP's Storage Tank Contamination Monitoring (STCM) database, and a FDEP Storage Tank Notification Form dated June 6, 1986, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place at a later date. AECOM did not locate tank closure documents for review. Closure assessments are required under Chapter 62-761 of the Florida Administrative Code (FAC), for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e., soil sampling and/or groundwater sampling), this listing is considered a REC and a vapor encroachment condition (VEC) to the subject property, in AECOM's opinion.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

A number of surrounding sites were identified in the Environmental Data Resources (EDR) environmental database search report. Based on AECOM's review and analysis of the database listings, none of the surrounding sites are expected to present a REC to the subject property, based on absence of documented contamination, distance (generally greater than 500 feet) from the subject property, regulatory status (i.e., regulatory closure, no violations found), media impacted (soil only), and/or topographical position relative to the subject property (i.e., down-gradient or cross-gradient).

The following REC and VEC was identified during this assessment:

- The subject property was identified on the UST database with Florida Department of Environmental Protection (FDEP) Facility ID (No.) 8733118. According to information found on the FDEP's Storage Tank Contamination Monitoring (STCM) database, and a FDEP Storage Tank Notification Form dated June 6, 1986, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place at a later date. AECOM did not locate tank closure documents for review. Closure assessments are required under Chapter 62-761 of the FAC, for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e., soil sampling and/or groundwater sampling), this listing is considered a REC and VEC to the subject property, in AECOM's opinion.

1. Introduction

1.1 Purpose

This Phase I Environmental Site Assessment (Phase I ESA) was performed pursuant to AECOM Technical Services, Inc. (AECOM's) written proposal, dated October 30, 2024, and Contract No. 4600004507-Work Order No. 14, for the S33 Gated Spillway Facility identified by Broward County Parcel Identification Numbers (PINs) 5042-06-00-0010 (portion) and 5042-06-00-0110 (portion), Lauderhill, Broward County, Florida (herein referred to as the "subject property"). This assessment was performed in advance of the potential spillway improvements at the subject property.

The purpose of this Phase I ESA is to provide the client with information for use in evaluating recognized environmental conditions (RECs) associated with the subject property. Per ASTM International, Designation: E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21), potential findings can include RECs, historical RECs (HRECs), controlled RECs (CRECs), de minimis conditions (DMCs) and significant data gaps as follows:

- A REC is defined by the ASTM standard as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." The term includes hazardous substances or petroleum products even under conditions in compliance with laws.
- A HREC is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority and meeting unrestricted use criteria established by a regulatory authority or authorities without subjecting the subject property to any required controls.
- A CREC is defined as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (activity and use limitations or other property use limitations).
- DMCs are conditions related to a release that generally do not present a threat to human health or the environment and generally would not be subject to enforcement action if brought to the attention of the appropriate governmental agencies.
- A significant data gap is a data gap that affects the ability of the environmental professional to identify a REC.

In addition, a Tier 1 vapor encroachment screening (VES) is completed as part of this assessment. This screening is conducted in general accordance with ASTM International, Designation: E2600-22, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions dated May 2022 (ASTM E2600-22). The objective of the VES is to evaluate if a vapor encroachment condition (VEC) exists or if a VEC does not exist.

This Phase I ESA is based on a review of existing conditions, reported pre-existing conditions, and observed operations at the subject property and adjacent properties.

1.2 Scope of Work

The Phase I ESA included a site visit, interviews, regulatory research, historical review, and a review and an environmental database analysis of the subject property. In conducting the Phase I ESA, AECOM assessed the subject property for visible signs of possible contamination, researched public records for the subject property and adjacent properties (as applicable), and conducted interviews with persons knowledgeable about the subject property. Non-Scope Services per ASTM E1527-21 including, but not limited to, asbestos, lead paint, radon, floodplains and wetlands were not included in the scope of work. On April 17, 2024, EPA signed the final rule 20 to designate perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) collectively identified as per- and polyfluoroalkyl substances (PFAS) as hazardous substances under section 102(a) of CERCLA. This designation allows EPA to use its CERCLA enforcement authorities, as appropriate and where relevant statutory elements are met, which could shift the cost burden of CERCLA response costs from the Superfund to Potentially Responsible Parties (PRPs). As such, PFAS, is now considered part of the ASTM standard scope and is included in this scope of work.

This project was performed in general accordance with ASTM E1527-21 and AECOM's proposal, dated October 30, 2024. Conclusions reached in this report are based upon the assessment performed and are subject to limitations set forth in Sections 1.3, 1.4, and 1.5 below.

1.3 Study Limitations

This report describes the results of AECOM's Phase I ESA to identify the presence of conditions materially affecting the subject facility and/or property within the limits of the established scope of work as described in our proposal.

As with any due diligence assessment, there is a certain degree of dependence upon oral information provided by facility or site representatives, which is not readily verifiable through visual observations or supported by any available written documentation. AECOM shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed by facility or site representatives at the time this assessment was performed. In addition, the findings and opinions expressed in this report are subject to certain conditions and assumptions, which are noted in the report. Any party reviewing the findings of the report must carefully review and consider all such conditions and assumptions.

This report and all field data and notes were gathered and/or prepared by AECOM in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of AECOM's assessment of the subject property. The statements, findings and opinions contained in this report are only intended to give approximations of the environmental conditions at the subject property.

As specified in ASTM E1527-21, it is incumbent that the client and any other parties who review and rely upon this report understand the following inherent conditions surrounding any Phase I ESA:

- Uncertainty Not Eliminated - No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a subject property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a subject property, and this practice recognizes reasonable limits of time and cost. (Section 4.5.1 of ASTM E1527-21)
- Not Exhaustive - "All appropriate inquiries" does not mean an exhaustive assessment of a property. There is a point at which the cost of information or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of ASTM E1527-21)
- Comparison with Subsequent Inquiry – It should not be concluded or assumed that an investigation was not AAI merely because the inquiry did not identify RECs in connection with a subject property. ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent ESAs should not be considered valid standards to judge the

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors. (Section 4.5.4 of ASTM E1527-21)

A similar set of inherent limitations exist in cases where the Phase I ESA included a screening-level assessment of vapor migration or vapor encroachment; such an assessment is a required part of a Phase I ESA when ASTM E1527-21 is employed. According to ASTM E2600-22, the following limitations apply:

- Uncertainty Not Eliminated in Screening - No VES can wholly eliminate uncertainty regarding the identifications of VECs in connection with the target property. Screening is intended to reduce, but not eliminate, uncertainty regarding whether or not a VEC exists in connection with the property. (Section 4.5.1 of ASTM E2600-22)
- Not Exhaustive - The guide is not meant to be an exhaustive screening. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions. One of the purposes of this guide is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing a VES and the reduction of uncertainty about unknown conditions resulting from additional information. (Section 4.5.2 of ASTM E2600-22)
- Comparison with Subsequent Investigations - It should not be concluded or assumed that an investigation was not adequate because the investigation did not identify VECs in connection with a property. The VES must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent VESs should not be considered valid bases to judge the appropriateness of any prior screening if based on hindsight, new information, use of developing technology or analytical techniques, or similar factors. (Section 4.5.4 of ASTM E2600-22)

This report was prepared pursuant to an agreement between South Florida Water Management District (SFWMD) (Client) and AECOM and is for the exclusive use of the Client. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without first obtaining AECOM's written consent and provided any such party signs an AECOM-generated Reliance Letter. A third party's signing of the AECOM Reliance Letter and AECOM's written consent are conditions precedent to any additional use or reliance on this report.

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions, which would render the report inaccurate. Reliance on this report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk.

1.4 Report Viability

According to ASTM E1527-21, an ESA "meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components presented in 4.6.2(i), (iii), (iv), and (v) for interviews, review of government records, visual inspections, and declaration by environmental professional, shall be identified in the report. Completion of searches for recorded environmental cleanup liens (4.6.2(ii)) is a user responsibility; however, if the user has engaged the environmental professional to conduct these searches, then that date shall also be identified in the report." The table below lists the dates of completion for pertinent components of this Phase I ESA.

Component	Date of Issuance/Completion
Interviews with Owners, Operators and Occupants	January 22, 2025
Environmental Database Report	November 1, 2024
Visual Inspection of the Subject Property and Adjoining Properties	January 10, 2025/January 22, 2025
Declaration by Environmental Professional	August 20, 2025
Issuance of Report	August 20, 2025

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

Report Viability Expiration Date*	April 30, 2025

* The 180-day viability date is based on the earliest referenced component noted in the table above.

1.5 Data Gaps

Per ASTM E1527-21:

- A data gap is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.
- A data gap is considered a significant data gap if other information and/or professional experience raises reasonable concerns involving the effects of that data gap on the ability of the environmental professional to render an opinion regarding whether conditions exist that are indicative of RECs or CRECs.

The following data gaps (to include site-specific limitations) were encountered during the course of this assessment:

- During the site visit, AECOM did not access the roof of the control building. AECOM's evaluation of the subject property focused on areas where hazardous substances are handled. The site contact did not report any hazardous substances associated with the roof. Based on this information, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- Approximately 33% of the subject property is covered by water; therefore, not all areas were able to be observed/assessed. Based on the use of this portion of the subject property and a review of historical documents, this particular site-related limiting condition is not expected to have a significant limitation to this assessment.
- As specified in the agreed upon scope of work, a title search and environmental lien search were not conducted as part of this Phase I ESA. The user was not aware of environmental liens or activity use limitations (AULs) that have been placed on the subject property. Based upon historical data collected from other sources, this data gap is not expected to be significant so that it would impact the results of this assessment.
- A data failure was encountered in determining the historical use of the subject property. The earliest source of historical information reasonably ascertainable within the time frame of this report in which usage could be determined was an aerial photograph from 1940. At the time of the photograph, a portion of the subject property appeared to be developed with a canal (a developed use per ASTM E1527-21). Therefore, the ASTM E1527-21 requirement to determine all obvious uses of the property from the present back to the property's first obvious developed use, or back to 1940, whichever is earlier, could not be achieved. However, based upon the identified land use, it is unlikely that there had been significant prior development; therefore, this data failure is not expected to be significant so that it would impact the results of this assessment.
- It should be noted that not all standard historical sources, as defined per ASTM E1527-21, were reviewed as part of this assessment. In addition to recorded land title records, building department records were not reviewed. Based on information provided from the remaining standard historical sources, additional historical information obtained from building department records would not likely have assisted in meeting the historical use requirement; therefore, this data gap is not expected to be significant so that it would impact the results of this assessment.
- Per ASTM E1527-21, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. AECOM was unable to interview past owners and/or operators at the subject property. However, based upon historical data collected from other sources, this data gap is not expected to be significant so that it would impact the results of this assessment.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

- Per the agreed scope-of-work and ASTM E1527-21, information related to certain site-specific items should be provided by the Phase I ESA report user to AECOM. To assist the user in gathering information that may be material to identifying RECs, AECOM provided the Client (the users) with the User Questionnaire from ASTM E1527-21; at this time the completed form has not been returned for inclusion in this report. However, this data gap is not expected to represent a significant data gap to this investigation, given the historical use of the subject property.
- AECOM submitted a Public Records Request (PRR) to the Lauderhill Fire Rescue and the Florida Department of Environmental Protection (FDEP) to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's PRR has not been received. Based on AECOM's research to date, AECOM does not anticipate the response (if any) from the Lauderhill Fire Rescue or FDEP to our PRR will significantly alter the conclusions or recommendations of this report. However, if information is received from this PRR that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

2. Site Description

2.1 Site Location and Parcel Description

The subject property consists of 6.7-acres of land and canal situated on portions of two contiguous parcels identified by Broward County PIN's 5042-06-00-0010 and 5042-06-00-0110, and located in Lauderhill, Broward County, Florida. The subject property is a rectangular shape tract of land and canal that includes a gated spillway structure, S33, situated within the North Fork New River (NFN River), adjacent south of Sunrise Boulevard. The subject property is accessed from an unnamed, unpaved road along the eastern property boundary, accessible from Northwest 34th Avenue. The approximate location of the subject property is illustrated on Figure 1 - Site Location Map.

2.2 Site Ownership

According to the Broward County Property Appraiser's records, the subject property is owned by SFWMD.

2.3 Site Visit

Ms. Kelsey Esteves and Mr. Matthew Schlak with AECOM visited the subject property on January 10, 2025, and Ms. Esteves visited the subject property again on January 22, 2025. The initial site visit included a visual inspection of the exterior portions of the subject property and the surrounding area. During the initial site visit, the AECOM team was unaccompanied. During this visit, the onsite structure was inaccessible. As a result, a follow up visit was conducted in order to observe the interior of the site building. During the January 22, 2025, site visit, Ms. Esteves was accompanied by Mr. Josh Feltner, Leasing & Real Estate Support – Environmental Science Unit, of the SFWMD to subject building. Site-related limiting conditions encountered during this assessment were previously summarized in Section 1.5.

The site visit methodology consisted of walking over accessible areas of the subject property, including the building interior and exterior, the perimeter, and the portions of the surrounding area. The following sections summarize the results of the site visits.

2.3.1 Site and Facility Description

The approximate 6.7-acre subject property encompasses approximately 2.2 acres of the NFN River, a gated spillway structure, S33, and a single-story control building that houses electronical equipment used to operate the water control structure. The gated spillway structure is not manned, and the operations are automatically, or telemetry controlled. The southern portion of the subject property bordering the NFN River is landscaped with grass and aboat ramp was observed on the southwestern portion of the subject property. Utility conduits crossing the NFN River, west of the S33 structure were observed. The eastern and western portions of the subject property are occupied by the NFN River and the northern portion consists of concrete canal embankment.

The onsite control building is a reinforced concrete, gated spillway, with discharge controlled by cable operated, vertical lift gates. The operation of the gates is automatically controlled so that gate operating system opens or closes the gates in accordance with seasonal operational criteria.

During the site visit, one (1) underground storage tank (UST) containing propane of an unknown quantity was observed next to the control building, on the southcentral portion of the subject property. No visual evidence of potable water wells, monitoring wells, clarifiers, dry wells, septic tanks, or leach fields were observed during the site visit. No visual evidence of discolored soil, water, or unusual vegetative conditions or odors was identified during the site visit. In addition, no visual evidence of significant corrosion was identified on the floors or walls of the spillway structure or control building of the subject property. The general layout of the subject property is illustrated on Figure 2 - Site Plan and Representative Site Photographs are provided in Appendix A.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

2.3.2 Surrounding Properties

The subject property is located in a mixed-use area of residential and commercial properties within the city of Lauderhill. The subject property is bordered to the north by Sunrise Boulevard followed by a number of commercial properties including the Swap Shop Flea Market and a Marathan Gas Station. The subject property is bordered to the east by a bridge for Northwest 34th Avenue followed by the NFN River. The subject property is bordered to the south by single-family residential properties. The subject property is bordered to the west by the NFN River.

AECOM did not identify any additional gasoline service stations or dry cleaners in the immediate vicinity (500 feet) of the subject property. One (1) sensitive receptor (i.e., day care centers, schools, hospitals, water bodies) was identified adjacent south of the subject property. Based on AECOM's site reconnaissance of the surrounding neighborhood, no off-site sources of concern were identified.

2.3.3 Petroleum Products and Hazardous Materials

No petroleum products or hazardous materials use, or storage was observed at the subject property. Staining or visual evidence of a hazardous materials release was not observed at the time of the site visit.

2.3.4 Hazardous Waste

No evidence of hazardous waste generation was observed at the subject property, and the site contact reported no such activities. In addition, the subject property was not listed as a generator of hazardous waste in the site-specific database report.

2.3.5 Polychlorinated Biphenyls

Polychlorinated biphenyl (PCB)-containing dielectric fluids have been widely used as coolants and lubricants in transformers, capacitors, and other electric equipment due to their insulating and nonflammable properties. Based on the use of the site, PCBs are not expected to be present on-site.

Hydraulic equipment (transformers, trash compactors, lifts) was not identified on the subject property. The on-site loading docks are manually operated.

2.3.6 Aboveground Storage Tanks

Aboveground storage tanks (ASTs) were not observed on the subject property during the site visit. Mr. Hobbs indicated that no ASTs are located on the subject property or have historically been located on the subject property. In addition, no ASTs were listed in the site-specific environmental database report reviewed by AECOM or otherwise identified during AECOM's review of historical aerial photographs.

2.3.7 Underground Storage Tanks

One (1) UST containing propane of an unknown capacity was observed next to the onsite structure on the southcentral portion of the subject property. Due to the nature of propane (gas at normal temperature and pressure), this propane storage is not considered a significant concern.

One (1) 110-gallon UST formerly containing unleaded gasoline was previously maintained at the subject property. The UST is discussed in more detail in Section 5.3.1.

2.3.8 Solid Waste

Based on the lack of activities on-site, no solid waste is expected to be generated at the subject property. However, miscellaneous trash such as discarded clothing and plastic bottles, were observed on the southcentral portion of the subject property. No evidence of oil or hazardous materials were observed in the vicinity of these discarded items and no evidence of a release was identified; therefore, the inappropriate disposal of these items is not considered a REC.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

2.3.9 Water

Municipal water is not currently provided to the subject property. No potable water wells were observed at the subject property or reported by the site contact to be present on-site.

2.3.10 Wastewater

Due to the lack of activities on-site, no wastewater is currently generated on the subject property.

2.3.11 Stormwater

Stormwater from the subject property appears to drain via sheet flow to the stormwater catch basin located in the southcentral portion of the subject property. The subject property is connected to the municipal stormwater sewer system. No staining was identified in the vicinity of the storm drain.

2.3.12 Heating and Cooling

The on-site spillway structure and control building are not equipped with heating or cooling services.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

3. Environmental Setting

3.1 Topography

The United States Geological Survey (USGS) 7.5-minute topographic maps of the Fort Lauderdale North and Fort Lauderdale South, Florida quadrangles indicate that the subject property elevation ranges from approximately 0 to 7 feet above mean sea level (amsl). Approximately 2.2 acres of the 6.7-acre site consist of the NFN River. However, the remaining subject areas are developed and surface water runoff from the subject property is likely diverted to man-made drainage systems which likely drains toward the canal at the center of the site.

3.2 Soil/Geology

Site-specific geologic information was not identified during the course of this assessment; however, according to state and regional geologic sources, the subject property lies within the Gold Coast – Florida Bay Physiographic District. This is the area of south and southeastward sluggish drainage from Lake Okeechobee. The rocks and sediment are Pleistocene aged and are largely limestones or limestone cap rocks. The site lies within the sub classification of the Southern Atlantic Coastal Strip Subdistrict. The subdistrict consists of a broad ridge underlain by sand and shelly sand that probably originated as a shoal. Very gentle slopes exist on the westward side. The eastern side is more complex having been subsequently modified by marine processes. Within the Southern Atlantic Coastal Strip are six (6) geologically distinct sections. The subject site lies within the Pompano-Fort Lauderdale Gap. This is an area with no detectable coastal ridge; the elevations are generally 10-12 feet amsl (UF, 1981).

Surface soils at the subject property are mapped as the Immokalee, limestone substratum-Urban land complex and Margate find sand (USDA, 2015). Immokalee, limestone substratum-Urban land complex soils are areas where components are so intermixed or so small that mapping them separately was not practical. Depth to the water table depends on the established drainage in the area and the amount of fill material that has been added, but the water table is deeper in most areas than is normal for Immokalee soils. About 30 to 50 percent of the complex is open land, such as lawns, vacant lots and playgrounds; and about 40 to 70 percent is Urban land, or areas covered by sidewalks, streets, parking lots, and buildings, where the natural soil cannot be observed. The open land consists of nearly level, poorly drained Immokalee, limestone substratum, soils. Typically, the surface layer is very dark grey sand about 5 inches thick. The subsurface layer is light gray and white sand to a depth of about 48 inches. The subsoil is black sand about 10 inches thick. The sand grains are well coated with organic matter in this layer. Soft, porous limestone containing solution holes filled with sand and rock fragments is at a depth of about 58 inches. Most areas of these soils are covered by 4 to 20 inches of gravelly sand fill material. Margate fine sand is a nearly level, poorly drained, sandy soil that is underlain by limestone at a depth of 20 to 40 inches but has solution holes as deep as 60 inches. It is on nearly level, low terraces between the Everglades and the low, sandy Atlantic Coastal Ridge. Included with this soil in mapping are small areas of Basinger fine sand and Plantation much, and small areas of soils that have up to 8 inches of organic material on the surface. Also included are some areas of soils that are similar to Margate fine sand but have a very dark gray or black surface layer less than 6 inches thick to a dark gray or gray surface layer 3 to 6 inches thick. The natural vegetation consists of native grasses, waxmyrtle, and a few cypress trees. Most areas of this soil are in improved pasture and some citrus. This soil is severely limited for cultivated crops by excessive wetness and other poor soil properties (USDA, 1981).

3.3 Groundwater/Hydrology

Site-specific hydrologic information was not identified during the course of this assessment. Based on topography and geologic conditions, uppermost groundwater likely occurs within 3 to 4 feet of the ground surface at the subject property (USGS, 1995). Uppermost groundwater flow direction likely follows local topography generally southeast and towards the NFN River. It should be noted that the actual depth and flow direction of groundwater beneath the subject property cannot be determined without site-specific groundwater monitoring well data.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

4. Site and Area History

Historical information for the subject property and surrounding properties is based on AECOM's review and analysis of the following historical sources:

- Aerial photographs dated 1940, 1947,1952, 1958, 1961, 1968, 1971, 1973, 1981, 1988, 1992, 1995, 1999, 2007, 2010, 2015, and 2019;
- Google Earth aerial images dated 1995, 1999, 2002 through 2011, and 2013 through 2024;
- Topographic maps dated 1945, 1949, 1962, 1969, 1970, 1973, 1983, 1994, 1995, 2012, 2015, 2018, and 2021;
- City directories for the years 1957, 1961, 1962, 1965, 1970, 1979, 1980, 1985, 1986, 1990, 1992, 1995, 1999, 2000, 2005, 2010, 2014, 2017, and 2020;

Building Department records were not reviewed during the course of this assessment. According to Environmental Data Resources, Inc. (EDR), Sanborn® Fire Insurance Map coverage is not available for the subject property. Copies of the historical documents/reports are provided in Appendix B.

4.1 Subject Property

AECOM's historical review indicated that the subject property consisted of vacant, wooded land by at least 1940. A river, consistent with present-day NFN River is depicted bisecting the subject property. The subject property remained in this general configuration through at least 1958. By at least 1958, the NFN River has been widened and the present-day gated spillway structure, S33, is depicted within the NFN River, on the eastern portion of the subject property. Additionally, an L-shaped canal is depicted on the southeastern side of the S33 structure and continues south. By at least 1968, the utility conduits crossing the canal, west of S33 are depicted. By at least 1971, the present-day control building, southwest of the gated spillway structure S33 is depicted. The subject property remained in this general configuration through at least 2002 when, the L-shaped canal has been modified with a culvert and backfilled. By at least 2008, improvements to the northern canal embankment are depicted. The subject property remained in its current configuration (as observed during AECOM's site visit) since at least 2008. No recognized environmental conditions (RECs) were identified based on the historical review. No historical on-site or off-site sources of concern were identified during this assessment.

4.2 Adjoining Properties and Surrounding Area

The 1940 historical aerial depicts the northern and southern adjoining properties to consist of undeveloped vegetated land. The NFN River is depicted on the eastern and western adjoining properties, beyond which consists of undeveloped vegetated land. By at least 1958, residential development is depicted on the southern adjoining property as well as a narrow canal extending south from the central portion of the subject property. Additionally, present-day Sunrise Boulevard is depicted on the northern adjoining property. By at least 1961, Northwest 34th Avenue is depicted on the eastern adjoining property. Additionally, a gas station (present-day Marathon Gas) and structure (present-day Wheels and Tires) is depicted adjacent north of Sunrise Boulevard. Residential development south of the subject property is depicted in its current configuration (as observed during AECOM's site visit) by at least 1961. By at least 1968, additional commercial development is depicted adjacent north of Sunrise Boulevard. By at least 1971, road improvements to Sunrise Boulevard are depicted. By at least 1981, the present-day Swap Shop Flea market and its associated is depicted adjacent north of the Sunrise Boulevard and additional commercial buildings and paved parking adjacent northwest of the subject property. By at least 1988, additional parking for the Swap Shop Flea Market is depicted adjacent north of the Sunrise Boulevard and west of the flea market.. By at least 2004, the commercial buildings adjacent northwest of the subject property have been razed. By at least 2005, an L-shaped lake is depicted adjacent northwest of the subject property and extends east, behind the Swap Shop Flea Market. The remaining surrounding areas are depicted in the general configuration observed during AECOM's site reconnaissance since at least 2005. The Marathon Gas Station is further discussed in Section 5.3.2. No historical off-site sources of concern were identified.

All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

4.3 Previously Prepared Environmental Reports

AECOM inquired about existing environmental reports associated with the subject property. Previously prepared environmental reports were not identified during this assessment, nor were they provided by the Client for review.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

5. Database and Records Review

5.1 User Provided Information

Section 6 of ASTM E1527-21 states that certain tasks, which will help to determine the possibility of RECs associated with the subject property, are generally conducted by the Phase I ESA report user. This includes the following: reviewing title records for environmental liens or activity and land use limitations and considering awareness of any specialized knowledge (e.g., information about previous ownership or environmental litigation), experience related to RECs at the subject property, or significant reduction in the purchase price of the subject property. Per the agreed scope-of-work, information related to these items should be provided by the Phase I ESA report user to AECOM. To assist the user in gathering information that may be material to identifying RECs, AECOM has provided the Client (the users) with the User Questionnaire from ASTM E1527-21; however, at this time the completed form has not been returned for inclusion in this report. This data gap is not expected to represent a significant limitation to this investigation based on other documentation reviewed as part of the Phase I ESA.

5.2 Land Title and Judicial Records for Environmental Liens and Activity and Use Limitations

Information pertaining to chain-of-title, environmental liens or activity and use limitation was not provided to AECOM by the User (i.e., the client), nor was AECOM contracted to obtain information pertaining to chain-of-title, environmental liens or activity and use limitations. Environmental agency databases as provided by EDR show no indication of deed restrictions or activity and use limitations due to a release of hazardous materials.

5.3 Database Information

In accordance with the scope of work and ASTM E1527-21, a search of various governmental databases was conducted by EDR. The site-specific environmental database report was reviewed to evaluate if soil and or groundwater from on-site and/or off-site sources of concern has the potential to impact the subject property. The database abbreviations are provided in the site-specific environmental database report. It should be noted that this information is reported as AECOM received it from EDR, which in turn reports information as it is provided in various government databases. It is not possible for either AECOM or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence.

The database report includes various reports detailing database information for each of the sites identified/geocoded within the specified radius. Two (2) additional sites were identified within the database report; however, EDR was not able to map them to specific locations due to insufficient/contradicting address information. These sites were included in the database report as "orphan" sites. Based upon AECOM's review, there do not appear to be significant concerns associated with any of the orphan sites. A summary of AECOM's review and analysis of the site-specific environmental database report is presented below. A copy of the database report is provided in Appendix C.

Based on AECOM's research, the subject property is not located on or within a 1-mile radius of tribal lands.

5.3.1 Subject Property

The subject property was identified on the UST database. Based on the current regulatory status (discussed in further detail below), it is AECOM's opinion that this listing is not a REC.

- South Florida Water Management District S-33, 3500 West Sunrise Boulevard, is listed on the UST database with FDEP Facility No. 8733118. According to an FDEP Storage Tank Notification Form dated January 16, 1990, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

at a later date. AECOM did not locate tank closure documents for review. No discharges were reported with regard to this listing. Closure assessments are required under Chapter 62-761 of the FAC, for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e, soil sampling and/or groundwater sampling), this database is considered a REC to the subject property, in AECOM's opinion.

5.3.2 Surrounding Sites

According to the environmental database report, numerous sites (over 20) were identified within their respective ASTM E1527-21 and/or EDR search distances from the subject property. Based on AECOM's review of these database listings, none of these sites are expected to present a REC to the subject property based on their distance from the subject property, regulatory status (i.e., closed, no violations found), media impacted (i.e., soil only), and/or topographical position from the subject property (i.e., down-gradient or cross-gradient). Due to their proximity to the subject property, the following sites are discussed in additional detail:

- B&P AMOCO/Swap Shop U Gas (present-day Marathon Gas), 3591 West Sunrise Boulevard, FDEP Facility ID No. 9201763, is located approximately 187 feet north of the subject property. This site is listed on the EDR Historical Auto, Broward Co. Hazardous Materials, UST, Leaking Underground Storage Tank (LUST), Division of Waste Management Contamination Sites (DWM Contam), and Financial Assurance databases. According to the available regulatory information reviewed, this site historically maintained seven (7) USTs. Three (3) 3,000-gallon USTs containing unleaded gasoline (removed), one (1) 3,000-gallon UST containing leaded gasoline (removed) two (2) 10,000-gallon USTs containing unleaded gasoline (in service) and one (1) 10,000-gallon UST containing vehicular diesel (in service). The first UST was installed in 1960. A discharge was reported August 24, 1990, discovered during UST removal. A Contamination Assessment Report (CAR) dated November 1990, reported a large groundwater plume migrated offsite to the north and east (away from the subject property). Source removal activities have been completed as well as a groundwater recovery, pump and treat system from October 1991 to February 1995. According to a Site Rehabilitation Completion Order (SRCO) dated April 15, 2015, the site received No Further Action (NFA) Status. Furthermore, the most recent Storage Tank Site Inspection Report, lists this facility regulatory status as "in compliance" for the three (3) remaining USTs onsite. Since this facility has been remediated to the satisfaction of FDEP and its current regulatory status is listed as "in compliance, this listing is not considered a REC to the subject property, in AECOM's opinion.

- Florida Drive-In Theatre Management Inc./3290 Sunrise Investments Inc., 3501 West Sunrise Boulevard, is located approximately 195 feet northeast of the subject property. This site is listed on the HAZ Waste, UST, LUST, DWM Contam, and Broward Co. EDIEAR databases. According to the available regulatory information reviewed, this site historically maintained twelve (12) USTs in four (4) separate tank farms. Ten (10) USTs contained unleaded gasoline, one (1) UST contained waste oil, and one (1) UST's contents are unknown. Seven (7) USTs have been removed from the site and the remaining five (5) USTs have been closed in place. There are currently no active USTs maintained onsite. In October 1992, petroleum impacted soils were encountered during UST removal and a tank closure assessment. Approximately 671 tons of petroleum impacted soil was removed from the site. Numerous groundwater monitoring wells are installed throughout the site and offsite from 1992 to 1994, east of Northwest 34th Avenue (eastern property boundary). The vertical and horizontal extent of the contamination has been delineated and is contained to the site. The site is currently in Natural Attenuation Monitoring. Given that the plume is contained within the boundaries of the site, this listing is not considered a REC to the subject property, in AECOM's opinion.

- Stevenson Oil Co Inc., 3391 West Sunrise Boulevard, is located approximately 215 feet northeast of the subject property. This site is listed on the EDR Historical Auto database. Based on a review of the available information, this facility appears to be part of the above-mentioned Florida Drive-In Theatre Management Inc./3290 Sunrise Investments Inc. site. Additionally, there is no additional information available for review for this facility. Based on the lack of documented contamination, this listing is not considered a REC to the subject property, in AECOM's opinion.

5.4 Vapor Encroachment Screening

AECOM conducted a Tier 1 VES as part of this assessment. This screening was conducted in general accordance with the ASTM E2600-22. The objective of the VES was to determine if a VEC exists or if a VEC does not exist.

5.4.1 Subject Property

The following VEC was identified during this assessment:

South Florida Water Management District S-33, 3500 West Sunrise Boulevard, is listed on the UST database with FDEP Facility No. 8733118. According to an FDEP Storage Tank Notification Form dated January 16, 1990, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place at a later date. AECOM did not locate tank closure documents for review. No discharges were reported with regard to this listing. Closure assessments are required under Chapter 62-761 of the FAC, for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e., soil sampling and/or groundwater sampling), it is in AECOM's opinion that a VEC exists in regard to the subject property.

To conduct the VES of the nearby area, AECOM conducted a detailed review and analysis of the site-specific environmental database report with particular focus on the follow two types of sites:

1. Off-site properties that are impacted by chlorinated volatile organic compounds (CVOCs) and/or semi-volatile-organic compounds (SVOCs) and are located within approximately 1,750 feet of the subject property, and
2. Off-site properties that are impacted by petroleum hydrocarbons and are located within approximately 525 feet of the subject property.

The following paragraph summarizes the results of AECOM's VES of the nearby area.

A review of the site-specific environmental database indicates that there are no CVOC/SVOC or petroleum hydrocarbon impacted sites are located with the above-described radii of the subject property. Based on this information, it is AECOM's opinion that a VEC at the subject property due to an off-site source does not appear to exist.

5.5 Agency File Review

5.5.1 Local

AECOM submitted a Public Records Request (PRR) to the Lauderhill Fire Rescue on January 9, 2025, to determine if they have files related to a historical hazardous materials release that may have occurred at the subject property. As of the date of this report, a response to AECOM's PRR has not been received. Based on AECOM's research to date, AECOM does not anticipate the response (if any) from the Lauderhill Fire Rescue to our PRR will significantly alter the conclusions or recommendations of this report. However, if information is received from this PRR that significantly impacts the conclusions of this report, this information will be forwarded upon receipt.

5.5.2 County

AECOM reviewed the Broward County Property Appraiser's online database for records pertaining to the subject property's physical and parcel addresses. No records were identified for the subject property physical and parcel addresses.

Copyright © 2025 by AECOM
All rights reserved. No part of this copyrighted work may be reproduced, distributed, or transmitted in any form or by any means without the prior written permission of AECOM.

5.5.3 State

AECOM submitted a Public Records Request to the FDEP on February 4, 2025, for information pertaining to the generation, transportation, storage, treatment and/or disposal of hazardous waste as well as any historical petroleum or chemical releases, leaking petroleum tanks, environmental assessment activities, and/or notices of violation that may have occurred on the subject property. No information was received during the time frame of this assessment.

5.5.4 Federal

AECOM searched the U.S. EPA's Envirofacts and Superfund Enterprise Management System (SEMS) online databases. The SEMS database replaced the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) which has since been retired. SEMS includes the same data fields and content as CERCLIS. The Envirofacts database retrieves information obtained from 17 national systems, including the CERCLIS, Superfund program (NPL sites), hazardous waste sites, and potentially hazardous waste sites. The subject property was not listed on the Envirofacts or SEMS databases.

6. Findings and Opinions

AECOM performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM E1527-21, which meets the requirements of Title 40, Code of Federal Regulations Part 312 and is intended to constitute *all appropriate inquiry* for purposes of the landowner liability protections. Any exceptions to, or deletions from, this practice are described in Section 1.3 through 1.5 of this report.

The following sections summarize the findings of this Phase I ESA and the opinions of the environmental professional.

6.1 Recognized Environmental Conditions

The following REC was identified during this assessment:

South Florida Water Management District S-33, 3500 West Sunrise Boulevard, is listed on the UST database with FDEP Facility No. 8733118. According to an FDEP Storage Tank Notification Form dated January 16, 1990, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place at a later date. AECOM did not locate tank closure documents for review. No discharges were reported with regard to this listing. Closure assessments are required under Chapter 62-761 of the FAC, for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e., soil sampling and/or groundwater sampling), this database is considered a REC to the subject property, in AECOM's opinion.

6.2 Controlled Recognized Environmental Conditions

Based on the above-described activities, no CRECs were identified in connection with the subject property.

6.3 Historical Recognized Environmental Conditions

Based on the above-described activities, no HRECs were identified in connection with the subject property.

6.4 Vapor Encroachment Conditions

The following VEC was identified during this assessment:

South Florida Water Management District S-33, 3500 West Sunrise Boulevard, is listed on the UST database with FDEP Facility No. 8733118. According to an FDEP Storage Tank Notification Form dated January 16, 1990, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place at a later date. AECOM did not locate tank closure documents for review. No discharges were reported with regard to this listing. Closure assessments are required under Chapter 62-761 of the FAC, for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e., soil sampling and/or groundwater sampling), it is in AECOM's opinion that a VEC exists in regard to the subject property.

6.5 De Minimis Conditions

Based on the above-described activities, no DMCs were identified in connection with the subject property.

6.6 Significant Data Gaps

ASTM E1527-21 requires the environmental professional document significant data gaps, as well as any exceptions to, or deletions from the ASTM Practice E1527-21. A significant data gap is a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

7. Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the S33 Gated Spillway Facility identified by Broward County PINs 5042-06-00-0010 (portion) and 5042-06-00-0110 (portion), Lauderhill, Broward County, Florida, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed the following REC and VEC in connection with the subject property:

- The subject property was identified on the UST database with Florida Department of Environmental Protection (FDEP) Facility ID (No.) 8733118. According to information found on the FDEP's Storage Tank Contamination Monitoring (STCM) database, and a FDEP Storage Tank Notification Form dated June 6, 1986, one (1) 110-gallon UST, formerly containing unleaded gasoline, was installed in 1970. According to correspondence from the SFWMD to the FDEP, the UST was emptied of its contents and abandoned in place at a later date. AECOM did not locate tank closure documents for review. Closure assessments are required under Chapter 62-761 of the FAC, for USTs of 110-gallons or greater. Based on AECOM's review and the lack of closure assessment conducted at the time of UST abandonment (i.e, soil sampling and/or groundwater sampling), this listing is considered a REC and VEC to the subject property, in AECOM's opinion.

8. Environmental Professional Statement

Mr. Madabhushi was the Environmental Professional (EP) for this project. Mr. Madabhushi's EP statement is below and his resume is provided in Appendix D:

I declare that, to the best of my professional knowledge and belief, I meet the definition of an EP as defined in §312.10 of 40 Code of Federal Regulations (CFR) and that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Inquiry # 7810853.4	Contact: Kelsey Esteves

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AECOM were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 60741079

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Dear Ms. Ginger

Subject: Updating Registration of Stationary Tanks

I am currently updating the District's storage tank records for our control structures and field stations. Please find enclosed the storage tank notification forms for the following structures and field stations:

1. S-40	2. S-41
3. S-36	4. S-33
5. S-60	6. Kissimmee Field Station
7. S-61	7. S-62

This is the most current information for the above mentioned structures and field stations. If you should require further information, please do not hesitate to call me at (407) 966-4329.

Sincerely,

John L. Leslie III

RETURN RECEIPT REQUESTED

Mr. Freddy Laverde
Swap Shop Service Station, LLC
9701 NW 89th Ave
Medley, FL 33178

Subject: Site Rehabilitation Completion Order
Swap Shop U-Gas #3207
3591 West Sunrise Boulevard
Fort Lauderdale, Broward County
FDEP Facility ID# 06/8501529
Discharge Date: August 24, 1990 (PLIRP)
Discharge Score: 10

Dear Mr. Laverde:

The Petroleum Restoration Program (PRP) has reviewed the Site Assessment Report (SAR) and No Further Action Proposal (NFAP) dated December 1, 2014 (received December 2, 2014), and the Monitoring Well Abandonment Report dated March 18, 2015 (received March 19, 2015), prepared and submitted by Advanced Environmental Technologies, LLC. for the petroleum product discharge referenced above. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-780.600, Florida Administrative Code (F.A.C.). In addition, documentation submitted with the SAR/NFAP confirms that criteria set forth in Subsection 62-780.680(1), F.A.C., have been met. Please refer to the attached maps of the source property and analytical summary tables. The SAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

In the event concentrations of contaminants of concern are detected above the levels approved in this Order, the department will reevaluate the contamination and reinitiate State-funded site or discharge rehabilitation to reduce concentrations of contaminants of concern to the levels approved in the Order or otherwise allowed by Chapter 62-780, F.A.C., in accordance with the State-funded eligibility provisions that are applicable for the site or discharge. This includes any

confirmed impacts found to be migrating beyond the site's property boundary. If groundwater is being used for potable uses in the area affected by the contamination, the Department will take all necessary steps to protect public health, safety and welfare under Chapter 376, F.S., as necessary. If a new or subsequent discharge occurs at the facility that is not eligible for state funding, the contamination must be evaluated and addressed as provided in Chapter 62-780, F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SAR/NFAP you do not have to do anything. This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Swap Shop Service Station, LLC., shall mail a copy of the request to Swap Shop Service Station, LLC at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Swap Shop Service Station, LLC, shall mail a copy of the petition to Swap Shop Service Station, LLC at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;

(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;

(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;

(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;

(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the PRP's review of the SAR/NFAP should be directed to J. Lance Davis at (850) 222-6446 extension # 314. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 06/8501529. Please use this identification on all future correspondence with the Department.

Sincerely,

Diane D. Pickett, P.G.
Program Administrator
Petroleum Restoration Program

P.G. CERTIFICATION

Site Assessment Report/No Further Action Proposal dated December 1, 2014 (received December 2, 2014), for Swap Shop U-Gas #3207, located at 3591 West Sunrise Boulevard, Fort Lauderdale, FDEP Facility ID# 06/8501529.

I hereby certify that in my professional judgment, the components of this Site Assessment Report/No Further Action Proposal prepared for the August 24, 1990 petroleum product discharge discovered at the above-referenced facility satisfy the requirements set forth in Chapter 62-780, Florida Administrative Code (F.A.C.), and that the conclusions in this report provide reasonable assurances that the site rehabilitation objectives stated in Chapter 62-780, F.A.C., have been met.

___ I personally completed this review.

Notes: NA = Not Available.

NS = Not Sampled.

GCTLs = Groundwater Cleanup Target Levels specified in Table I of Chapter 62-777, F.A.C.

NADCs = Natural Attenuation Default Source Concentrations specified in Table V of Chapter 62-777, F.A.C.

** = As provided in Chapter 62-550, F.A.C.

[a] = See the October 12, 2004 "Guidance for the Selection of Analytical Methods and for the Evaluation of Practical Quantitation Limits" to determine how to evaluate data when the CTL is lower than the PQL.

If an analyte is not detected, report the method detection limit [i.e., 0.01 U or ND(0.01); BDL or <0.01 are not acceptable].

Freshwater Surface Water (FSW), Marine Surface Water (MSW) and Groundwater of Low Yield/Poor Quality (LY/PQ) CTLs should be added to the base of the table as applicable.

TABLE 4C: GROUNDWATER MONITORING WELL ANALYTICAL SUMMARY - ^Other Contaminants not listed in Chapter 62-770, F.A.C.

Facility ID#: 8501529 Facility Name: SWAP SHOP UGAS 93207

See notes at end of table.

GCTLs = Groundwater Cleanup Target Levels specified in Table I of Chapter 62-777, F.A.C.
NADCs = Natural Attenuation Default Source Concentrations specified in Table V of Chapter 62-777, F.A.C.
^ = These chemicals may be present in petroleum fuels but are not currently included in Table A of Chapter 62-770, F.A.C. (list of Petroleum Products' Contaminants of Concern), and therefore it is not required by rule that samples be analyzed for these chemicals. Summary columns have been provided for the convenience in which these chemicals and others reported by the laboratory are detected, to comply with subparagraph 62-770.600(6)(a)2., F.A.C.

If an analyte is not detected, report the method detection limit (i.e., 0.01 U or ND(0.01), BDL or <0.01 are not acceptable).
Freshwater Surface Water (FSW), Marine Surface Water (MSW) and Groundwater of Low Yield/Poor Quality (I.Y./P.Q.) CTLs should be added to the table as applicable.

Notes:

NM = Not Measured

NC = Not Calculated

The screen interval for MW-1 through MW-6 and DW-1 are assumed based on measured local well depths

STRUCTURE 33

This structure is a reinforced concrete, gated spillway with discharge controlled by cable operated, vertical lift gates. Operation of the gates is automatically controlled so that the gate operating system opens or closes the gates in accordance with the seasonal operational criteria. The structure is located on Canal 12 about 1/2 mile east of State Road #7.

PURPOSE

This structure maintains optimum upstream water control stages in Canal 12; it passes the design flood (50% of the Standard Project Flood) without exceeding the upstream flood design stage, and restricts downstream flood stages and channel velocities to non-damaging levels, and it prevents salt water intrusion into the area west of the structure.

OPERATION

This structure will be operated to maintain an optimum headwater elevation of 3.5 feet, when sufficient water is available to maintain this level. The automatic controls function as follows:

When the headwater elevation rises to 4.0 feet, the gates will open at six inches per minute;

When the headwater elevation rises or falls to 3.5 feet, the gates will become stationary;

When the headwater elevation falls to 3.0 feet, the gates will close at six inches per minute.

Salinity Regulation

In addition to maintaining optimum upstream fresh water control, as described above under Flood Control Regulation, the automatic controls on this structure have an overriding control which closes the gates, regardless of the upstream water level in the rare event of a high flood tide, whenever the differential between the head and tailwater pool elevations reaches 0.2 feet.

FLOOD DISCHARGE CHARACTERISTICS

	Design*	Standard Project Flood*
Discharge Rate	**920 cfs	**1180 cfs
	50 %SPF	100 %SPF
Headwater Elevation	** 5.9 feet	* 7.1 feet
Tailwater Elevation	** 4.9 feet	* 7.1 feet
Type Discharge	uncontrolled submerged	uncontrolled submerged

*Flow conditions given in the Definite Project Report. No discharge curves for this flow condition available.

**300 cfs added for Old Plantation pump station @ west end of C-12.
A large portion of the canal had been enlarged; water levels listed are based on increased flows and channel size.

Note: If uncontrolled, probably submerged, but possibly free.

DESCRIPTION OF STRUCTURE

Type reinforced concrete, gated spillway

Weir Crest

Net Length 20.0 feet

Elevation -2.0 feet

Service Bridge Elevation 11.5 feet

Water Level which will by-pass structure 10.0 feet

Gates

Number 1

Size 9.0 feet high by 20.0 feet wide

Type vertical slide gate

Top elevation of gates, full closed 7.0 feet

Bottom elevation of gates, full open 8.5 feet

Control on-site, automatic with headwater control with differential water surface control sensed by bubbler system, remote control by C&CS

Lifting Mechanism

Normal power source commercial electricity

Emergency power source LP gas driven generator

Type Hoist direct drive electric motor gear connected to cables

Date of Transfer: November 1, 1954

ACCESS: The structure is located on Sunset Blvd. about 3/4 mile east of U.S. 441.

HYDRAULIC AND HYDROLOGIC MEASUREMENTS

Water Level on-site dual analog and U.S.G.S. digital upstream and downstream recorders, remote upstream and downstream recorders

Gate Position Recorder on-site, analog recorder & U.S.G.S. digital recorder, remote recorder

Other _____

DEWATERING FACILITIES

Storage West Palm Beach Field Station

Type Steel needle beam and aluminum needles

Size and Number (per bay)_____

Upstream and downstream

Beam 12 WF 40, 21' -11" long

Needles 4 each 5' wide

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Cerclis ID:: 401078				
EPA Id: FLD981021470				

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there are 5 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

A review of the BROWNFIELDS list, as provided by EDR, has revealed that there are 3 BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal June 24, 1988): The Wingate Road Municipal Incinerator Dump covers 61 acres in Fort Lauderdale, Broward County, Florida. The site includes an incinerator, offices, and an approximately 40-acre disposal area, allowned and operated by the City of Fort Lauderdale. Land use in the area is a combination of residential, commercial, and industrial.
The incinerator and disposal areas were used during 1955-78. Residential waste, commercial waste, andincinerator residue were disposed of at the dump. According to a resident of the area, ha ardous waste may also have been dumped. In December 1981, the resident reported to the Broward County Health Department that 100 steel drums had been buried during 1955-58 north of the incinerator down a dirt road. The facility received 480 tons of waste a day and operated 7 days a week. It pumped cooling water into the incinerator from on-site wells and then discharged it into an unlined lagoon, possibly Lake Stupid in the southeast corner of the facility. Ash residues mixed with sludge material from the lagoon were spread onto the ground in the disposal area. The area is approximately 30 feet above ground, and the terrainis hilly

WINGATE ROAD MUNICIPAL INCINERATOR DUMP (Continued) **1000233060**

and partially overgrown with brush and small trees. Rock Pit Lake is downslope of the northeast section of the disposal area. Tests conducted in 1985 by EPA detected pesticides DDT, aldrin, chlordane, and dieldrin) in surfacecomposite soil and subsurface soil from the dump area. Elevated pesticide concen- trations were also reported in sediments from Rock Pit Lake, which is used for recreational activities. The lake intersects the Biscayne Aquifer, which EPA has designated as a sole source aquifer under the Safe Drinking Water Act. Thus, there is a threat of contaminants entering the aquifer. An estimated 353,000 people draw drinking water from four municipal well fields within 3 miles of the site: the Lauderhill Municipal Water Supply Well Field, the Broward County District 1A Well Field, the Prospect Well Field, and the Dixie Well Field. There is no unthreatened alternative source for the Lauderhill field. The site is only partially fenced, making it possible for people and animals to come into direct contact with ha ardous substances. Approximately 44,000 people live within 1 mile of the site. Status October 4, 1989): EPA is conducting a search to identify parties potentially responsible for wastes associated with the site. The State is reviewing Fort Lauderdale s plan for closing the dump under the Resource Conservation and Recovery Act. Fort Lauderdale has fenced the site.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichloroethylene
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.

MASSEY YARDLEY DODGE CHRYSLER JEEP DODGE RAM (Continued) **1000380860**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
